Enter your question or comment	I am a first year college student studying Agriculture with a concentration in Communications. My major of choice stems from my want to advocate for this community that I am very passionate about. By not speaking out on the Oak Run Project, I would not be fulfilling my duty of advocating for the industry that feeds the world. Not only would you be directly impacting my family of farmers, but also those farmers in the area whose livelihood depends on farming. Madison County has already lost an adequate amount of farm land for these solar panels. Acres are slowly starting to be stripped away from the farmers and it needs to be stopped.
