**RE: In the Matter of the Lott 138-kV Transmission Line Project
Case No. 22-0940-EL-BTX
Proof of Compliance with O.A.C. 4906-6-07 and 4906-6-08**

Dear Ms. Troupe:

Ohio Power Company hereby files this proof of compliance with the notice requirements set forth in Rules 4906-6-07 and 4906-6-08 of the Ohio Administrative Code for the above-referenced project applications:

1. In accordance with O.A.C. 4906-6-07(A), Ohio Power Company shipped Notification Letters to public officials and libraries on October 26, 2022, via USPS First Class Mail.
2. In Accordance with O.A.C. 4906-06-08(B). AEP Transmission Company, Inc. Notification Letters describing the project to each property owner and affected tenant via USPS First Class Mail on October 26, 2022. The letter met all the requirements of this rule.

Respectfully submitted,
/s/ Hector Garcia-Santana
Hector Garcia (0084517)
Counsel for Ohio Power Company

RE: Lott 138-kV Transmission Line Project Update & Open House Invitation
To be filed as Lott 138 kV Transmission Line Project
Case No. 22-0940-EL-BTX

Dear Neighbor,

You are receiving this letter because public records indicate you own property or live in the area that is part of AEP Ohio's Lott 138-kV Transmission Line Project. We are writing to invite you to a project open house and update you on the next steps in the project.

Company representatives announced the Lott 138-kV Transmission Line Project in fall 2020. The project involves building about 4 miles of power line and a switch pole north of Locust Drive in Porter and Trenton townships, Delaware County. The proposed powerline provides an enhanced power source to Consolidated Cooperative's Lott Substation from AEP Ohio's Centerburg – Trent 138-kilovolt (kV) transmission line. By connecting a 138-kV power line to the Lott Substation, Consolidated Cooperative can better serve area customers.

Since the announcement the following events have taken place, AEP Ohio representatives:

- Hosted a virtual open house to gather feedback on route options in fall 2020
- Announced a proposed final line route in spring 2021
- Determined the need for additional field survey work in spring 2022
- Developed an additional route for consideration in summer 2022

We are hosting an in-person open house and virtual open house and invite you to learn more and share your input on both route alternatives for the 4 miles of 138-kV power line. Please join us from **5:30 to 7:30 p.m.** on **Wednesday, November 16**, at **Centerburg High School Cafeteria** located at **3782 Columbus Road in Centerburg**. You can view detailed maps and talk with team members about the project. There is no formal presentation, so you can arrive at any time during the event.

At AEP Ohio, safety is our first priority. Face masks and hand sanitizer will be available at the open house. If you are feeling unwell or experiencing COVID-19 symptoms, we ask that you stay home and visit the **VIRTUAL OPEN HOUSE at [AEPOhio.com/Lott](https://www.aepohio.com/Lott)** to access information, view an interactive map, enter our virtual open house and submit comments through the project website. You may also complete the enclosed comment card and mail it back to us.

Our team plans to use your input and additional field work to determine a power line route that minimizes impact on the community and environment. **Please share your input by Wednesday, November 30.** We welcome and encourage your feedback about this project.

When sharing your input please feel free to include information about your property, such as:

An **AEP** Company

- Historically significant buildings or landmarks such as cemeteries
- Natural features such as wetlands or springs
- Future plans for your property

To construct the project, company officials must obtain the approval of the Ohio Power Siting Board (OPSB). Following the public input period, the AEP Ohio project team prepares and submits an application to the OPSB that includes information on both a preferred and alternate route for the 4 miles of proposed power line and switch pole north of Locust Road. Each proposed route must be designated as a preferred or alternate route and must be a viable alternative that can be constructed. The company plans to file the Lott 138 kV Transmission Line Project, Case No. 22-0940-EL-BTX in early 2023.

The OPSB is legally obligated to review the application and, if certain legal criteria are met, it may approve the project. OPSB approval is obtained through the issuance of a Certificate of Environmental Compatibility and Public Need. For more information on the OPSB, its composition and the process it follows in reviewing the application for the project, please visit www.opsb.ohio.gov. You can also contact OPSB staff via e-mail at contactopsb@puco.ohio.gov, by phone at 866-270-6722 or mailing correspondence to 180 East Broad Street, 11th Floor, Columbus, OH 43215.

A separate public hearing on the project will be scheduled in the future by the OPSB. You may request notice of the public hearing using any of the communication methods mentioned earlier in this letter. You can file a petition to intervene in the OPSB process with the siting board up to 30 days after the public hearing notice. The OPSB determines the final line route.

Please review the enclosed factsheet for more information. Feel free to contact me if you have any questions.

Sincerely,

Meghan Blankenship

RE: Lott 138-kV Transmission Line Project Update & Open House Invitation

To be filed as Lott 138 kV Transmission Line Project

Case No. 22-0940-EL-BTX

Dear «ADDRESSEE»:

You are receiving this letter because AEP Ohio officials have proposed electric transmission line upgrades in your area. We are writing to invite you to a project open house and update you on the next steps in the project.

Company representatives announced the Lott 138-kV Transmission Line Project in fall 2020. The project involves building about 4 miles of power line and a switch pole north of Locust Drive in Porter and Trenton townships, Delaware County. The proposed powerline provides an enhanced power source to Consolidated Cooperative's Lott Substation from AEP Ohio's Centerburg – Trent 138-kilovolt (kV) transmission line. By connecting a 138-kV power line to the Lott Substation, Consolidated Cooperative can better serve area customers.

Since the announcement the following events have taken place, AEP Ohio representatives:

- Hosted a virtual open house to gather feedback on route options in fall 2020
- Announced a proposed final line route in spring 2021
- Determined the need for additional field survey work in spring 2022
- Developed an additional route for consideration in summer 2022

We are hosting an in-person open house and virtual open house and invite you to learn more and share your input on both route alternatives for the 4 miles of 138-kV power line. Please join us from **5:30 to 7:30 p.m. on Wednesday, November 16**, at **Centerburg High School Cafeteria** located at **3782 Columbus Road in Centerburg**. You can view detailed maps and talk with team members about the project. There is no formal presentation, so you can arrive at any time during the event.

At AEP Ohio, safety is our first priority. Face masks and hand sanitizer will be available at the open house.
