Enter your question or comment	<p>I'm a resident of Madison county an am against the Oak Run Solar project. I've been an Ohio resident my entire life. As I drive around neighboring county's I see more and more "No Solar on Prime Farm Land". This is very concerning! Growing up in 4H and FFA I was educated on the importance of agriculture. Now we are stripping some of the best Land for solar panels. Not only will this project ruin natural habitats for wildlife it will propose a threat on endangered spices in the little Darby river. Madison County seed, fertilizer and equipment sales will be impacted immediately. Sales have already been affected from the other projects in our county. What is the end game? Driving down Big Plain Circleville road it is painful to see what has happened to the land. Tall prison like fences on both sides of the road. Now we have a landowner that rented his land to solar speaking out about how they have ruined his land. Madison County already has waisted enough prime farm land on solar. Its time we start preserving what we have and continue to be a county of agriculture heritage. Plus we already have two prisons in Madison County. We don't need more tall fences and waisted land. Thank you!</p>
