Enter your question or comment	As a lifelong resident of Madison County, I am commenting to ask you, to help us stop more solar panels from threatening our farmland. Madison County is know for Agriculture. It is what we teach our children and it is our way of life. The threat of taking away good soil to put these panels in the ground is horrible. Please help us stop these Solar Industries from taking more of our land. We take pride in what all of generation farmers have built, by feeding the livestock and people. And like our family, plan to pass it down to our children. If the land keeps getting overcome with the panels, what will be left?
