

Dear Board,

21-1231-EL-86N

I am opposed to allowing greedy industrial solar developers, like Invenergy, to come into what is zoned as farming and residential neighborhoods and destroy our property values, take away our rural country and agricultural farmlands for years to come. I am not going to list all of the many cons of having industrial solar tonight that are a part of why I want the Fountain Point Project denied. You have heard them all before.

Developers install products that not only will put my health and life at risk, but they even cause me to pay for these projects by using my tax money and raising my electric rates to help pay for the development that is surrounding my home as well as the new high transmission lines used to give the electricity to Google, Amazon and the other big corporations that are bribing our politicians. This is not funded by the landowners that leased their land, but paid for with our tax money. I am against my money being used to pay for this on someone's land for a project that will destroy everything I have created and worked hard to own.

The Logan County Commissioners voted to restrict solar. If Fountain Point hadn't been grandfathered in, the board would be forced to deny it. Also, hundreds of community members have signed petitions against it, township trustees have sent letters, and Ohio Congressmen have spoken against this project. Therefore, it does not satisfy the public interest, convenience, and necessity as required by your criteria. The Fountain Point Project should be denied.

I would say that in my mind, I have every right to be upset and demand that Fountain Point be denied!

Thank you.

PUCO
