Enter your question or comment	<p>We moved to our home in Madison County in 2009. We have been surrounded by farm land of corn, soybeans, winter wheat and alfalfa. We loved our view and our views traveling to town and to the Interstates. That has now changed with all of the beautiful trees being removed and the dirt and mud on the roads to the ugly views of solar panels all over this county. The Oak Run Solar Panel Project has taken over all the beautiful land. While we do not have the history of a family farm we have several friends who do and are family farmers, seed providers and crop insurance providers. We have made our home what we want it to be with beautiful landscaping and an inground pool where we can enjoy the view. Our view will soon be taken over by part of the Oak Run Solar Panels and that will be the view for us going forward. We chose this house bc of the farmland and families that surround it and that view will soon become a not so pretty view. Please understand it is their land to do with as they please but when the decisions were made the people who own the properties that surround them were not asked or involved in the decision making. This effects the property values of every home around Oak Run and Madison County. I strongly oppose moving forward with the Oak Run solar panel project.</p>
