**Re: Nottingham Solar LLC 138 kV Gen-Tie Transmission Line Project  
Case No. 22-1030-EL-BLN**

Dear Ms. Troupe:

Pursuant to OAC 4906-6-05(B)(8), an accelerated application must contain “a list of properties for which the applicant has obtained easements, options, and/or land use agreements necessary to construct and operate the facility and a list of the additional properties for which such agreements have not been obtained.” In its Letter of Notification (“LON”) filed on November 9, 2022, Nottingham Solar LLC (“Nottingham”) listed all the properties that it had identified for which it had already obtained lease agreements or was in the process of obtaining a lease or easement.

Subsequent to the filing of the Application, Nottingham obtained additional land information which indicates that Nottingham may need to obtain an additional easement with another landowner within the proposed project area. Nottingham has identified Parcel No. 02-00265.000 as an additional property for which Nottingham may need to obtain an easement. Nottingham is in discussions with the owner of this property, and expects to obtain any necessary land rights regarding this property well before construction.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Devin D. Parram
