<b>Enter your question or comment</b>	I live on a farm in Madison County, that has been in my family for multiple generations. This farm has raised livestock, crops , and numerous other things that have helped to support Madison County. The impact these solar farms will have on this county, and it's farmers, will be immeasurable. Not only will these have a negative effect on the land the panels are on, but it will effect all other surrounding farms and homeowner property. There is no way to put a price on quality of life. I strongly advise everyone to consider the big picture and long term effects this may have.
