Enter your question or comment	Please do not approve commercial solar projects in Ohio. It is in no way reasonable to take farmland and make it into a solar farm. Solar itself is a good thing, but don't ruin land. Especially when rooftops of almost every building are perfect for solar that generates power in a more efficient decentralized way. Incentivize residential solar more, remove the 80% cap that Ohioan's currently have so they can make money with solar, don't ruin farmland that I and many others dream of owning.
