Please file below as public comment with OPSB for all Highland and Clinton industrial solar projects.

"I oppose all negotiations and compromises by OPSB to reduce setbacks from roads and non participants property owner boundaries. The setbacks should be upheld to the fullest extent. If the industrial solar companies and participating landowners are as concerned about the environment as they speak so passionately about in the meetings, there are programs in place such as the Conservation Reserve Program (CRP) that can be utilized in the setback areas to keep down weed pressure, provide wildlife habitat and still produce a viable income and keep the land qualified for the CAUV program. The silent majority of Highland county residents have endured enough already and to offer even more concessions at this point is blatant neglect and dereliction of your duties. I am still waiting to see how these projects are truly justified "

Seth Rankin
