I'm truly shocked this has been planned to corrupt and agreed
Which technology progress has nothing to do with billing residence electrical spending
Consumer remind me about
Cable company's in the same
Perspective lease which is
Company cable box using there
Signal for there corporate signal
To apply internet
NOW THIS Crazy catch 22 AES
Who is responsible for this unit
Now part of the public trust
While they pass by in their mobile
Billing process checking on the meter just like the water dept
They not charging for public utility service
AES is crazy it's a monetary revenue not a option it's a permanent fix

Not fair to the public for service
It has a tracing track number
Sorry that's a electric company
Responsibility not the customers
Signal period
