DOCKETING DIVISION
Public Utilities Commission of Ohio

Dear OPSB members:

Considering several Solar projects being denied due to Public Opposition and other factors, I am requesting that the OPSB take this in consideration regarding the projects in Cass and Washington Twp to be determined as such this category. To reiterate our County and Local objection to the projects:

The Village of Arcadia serving both Townships is in opposition.

Local Fire Department and Health Department had objections and concerns toward these projects.

Numerous individuals gave testimony and reasons why these projects should NOT be approved on record.

County Commissioners voted for exclusionary zones in 16 out of 17 townships representing the entire county. (Solar companies canvassing the Findlay and local villages could not raise enough support to reverse the decision approved by the Commissioners.)

The township trustees in both townships oppose this project

These entities are indeed reasonable support for Public Opposition as well as other overwhelming pertinent information established and provided in the proceedings of these projects that should promote denial.

Once again, thank you for your attention to this matter.

Sincerely,

Pat True

Resident of Cass Township

Fact: Solar panels are not a constant dependable or reliable source of energy. They may provide a boost to the grid or a supplement or even a temporary source to support it but to give up farmland a constant and reliable as well as dependable food source for a temporary source of energy is ludicrous.
