Subject: solar farm

My name is Gary Lundy, Address is 20438 St Rt 12 Fostoria Ohio 44830. I have been to meetings and showed pictures about my yard and neighbors flooded. I do know solar panels are trough water off. Nothing has been done to the creek as in make it deeper or wider and that will make our water in my yard and neighbors yards stand longer and be higher. Other that was at the meeting have proof of drainage tiles in the field by maps, pictures, and receipts. All not taking in consideration. Now with pesticides, fertilizer higher in price and means less food will be produced. Bill Gates and China buying up our farmland. Where will that food go? So, less food for Ohio and America.

Now let's talk about clean energy. Do you know how lithium Batteries, metal, copper, plastic (battery box, wire insulation, ect...) is made? If not, please check out the emissions on the material needed to make the lithium, wire, metal and plastic. Cole, Gas, Electric, and even fresh water. Our drinking and bathing water.

How much percentage of jobs and money are going to American people? How much percentage of jobs and money are going overseas? Where is the money coming from? Is this benefiting Americans?

I am asking please check it to these things yourself and answer these four questions. Along with higher and longer standing water.

P. S. I do appreciate you reading this. So, thank you. Gary Lundy
