

Case No. 21-0669-EL-BGN

 **FILE**

February 10, 2023

To the Ohio Power Siting Board:

It's important to document the wild life in our area. These pictures were taken early Sunday morning on February 5, 2023, by Mary Tong. This is a very common sight in the Tong field. They gather almost like clockwork early morning & evening and we have counted as many as 42 in the group. They gather from the Tong, Moyer, Boes, Good & Mellot woods. Their water source is the mouth of the John E. Fox ditch, this ditch has already been documented on the large paper submitted at the hearing in Findlay from the Tongs'. These pictures are being submitted to further reinforce that this ditch is where our deer gather for their water. The John E. Fox ditch runs on an angle through the Mellot woods.

Sincerely,

  
Mary TongRECEIVED-DOCKETING DIV

Technician DLH Date Processed 2-16-23

A landscape photograph taken during the day. On the left, a large, dark, leafless tree stands prominently. The ground is a mix of dark grass and patches of white snow. In the background, there are several industrial structures: a tall lattice tower, a tall thin pole, and another lattice tower further to the right. The sky is bright and clear.
