| <b>Enter your question or comment</b>          | I oppose the Oak Run Solar project. It will poison the land and leach cadmium and lead into the watershed to all well heads down to the Ohio River. The public needs safe water more than solar energy that will not benefit the people near the land it will destroy. It will have a horrible impact on the wild life in the area. Deer get caught in these encampments and end up injured, and possible break panels as they try to get out of the area. There are too many other types of land that are expendable for this. if it is a public need. put it on public road lands. |
