

**BEFORE THE
PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Application of Ohio)
Edison Company, The Cleveland Electric)
Illuminating Company, and The Toledo)
Edison Company for Authority to Provide)
for a Standard Service Offer Pursuant to)
R.C. 4928.143 in the Form of an Electric)
Security Plan)

Case No. 23-301-EL-SSO

DIRECT TESTIMONY OF
DHARA PATEL
ON BEHALF OF
OHIO EDISON COMPANY
THE CLEVELAND ELECTRIC ILLUMINATING COMPANY
THE TOLEDO EDISON COMPANY

APRIL 5, 2023

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.**

3 A. My name is Dhara Patel. I am employed by FirstEnergy Service Company (“FESC”) as
4 an Analyst in the Ohio Rates and Regulatory Affairs department. My business address is
5 76 South Main Street, Akron, Ohio 44308.

6 **Q. PLEASE DESCRIBE YOUR BACKGROUND, PROFESSIONAL EXPERIENCE,
7 AND CURRENT JOB DUTIES.**

8 A. I received a Bachelor of Science degree and a Master of Business Administration degree
9 from Cleveland State University. I joined FirstEnergy Corp. in July 2017 as an analyst in
10 the Revenue Management department. In 2019, I started my current position in the Ohio
11 Rates and Regulatory Affairs group. My current responsibilities include serving as the lead
12 analyst for preparation of various riders for Ohio Edison Company, The Cleveland Electric
13 Illuminating Company, and The Toledo Edison Company (individually, “Company” and
14 collectively, the “Companies”), including the Companies’ rates for standard service offer
15 (“SSO”). I am responsible for conducting various rates and financial analyses for the
16 Companies, including typical bill analyses, and supporting rider audits.

17 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

18 A. The purpose of my testimony in the Companies’ proposed fifth electric security plan (“ESP
19 V”) is to address the Companies’ SSO rates and the estimated customer impacts of ESP V.

20 **Q. WHAT ARE THE ATTACHMENTS FOR WHICH YOU ARE RESPONSIBLE?**

21 A. I am sponsoring Attachment DP-1 which shows the estimated customer bill impacts from
22 ESP V and supporting work papers.

1 **II. STANDARD SERVICE OFFER GENERATION RATES**

2 **Q. HOW DO THE COMPANIES RECOVER THE COSTS OF SSO SERVICE**

3 **TODAY?**

4 A. The Companies recover the costs associated with SSO service through the Generation
5 Service Rider (“Rider GEN”), the Generation Cost Reconciliation Rider (“Rider GCR”),
6 the Alternative Energy Resource Rider (“Rider AER”), and the Non-Distribution
7 Uncollectible Rider (“Rider NDU”). Rider GEN is updated annually and is designed to
8 recover the costs of the Companies’ purchase power expense resulting from the
9 competitive bidding process (“CBP”) for SSO customers. The weighted average winning
10 CBP price for each year is converted to retail energy and capacity rates in Rider GEN,
11 including adjustments for seasonality, losses, and commercial activity tax (“CAT”). The
12 Companies’ actual purchase power expenses and Rider GEN revenues are reconciled in
13 Rider GCR, while Rider NDU recovers non-distribution uncollectible expenses associated
14 with the provision of SSO service. Rider AER recovers the costs associated with securing
15 compliance with the alternative energy resource requirements, including renewable energy
16 credits costs, any reasonable costs of administering requests for proposals, and applicable
17 carrying costs. Riders GCR, AER, and NDU are reconciled and updated quarterly to ensure
18 the customers are only paying for actual SSO expenses incurred in a timely manner and
19 are subject to reconciliation based on the results of annual audits.

20 **Q. ARE THE COMPANIES PROPOSING ANY CHANGES TO THESE SSO COST**

21 **RECOVERY RIDERS IN ESP V?**

22 A. No. The Companies are not proposing any changes to these SSO cost recovery riders in
23 ESP V. These riders will all continue under the same terms and conditions as today in ESP

1 IV. However, costs associated with the proposed CBP changes described in the testimony
2 of Companies' Witness R. Lee will be included in these riders.

3 **Q. HOW WILL THE COSTS ASSOCIATED WITH THE PROPOSED CBP**
4 **CHANGES IMPACT RIDERS GEN AND GCR?**

5 A. As discussed by Companies' Witness R. Lee, the Companies propose a volumetric risk cap
6 on load migration back to SSO service, whereby excess load migration would be served at
7 market prices and not under the terms of the SSO auctions. The costs of procuring power
8 associated with the excess load migration will be reconciled through Rider GCR.
9 Additionally, the Companies are proposing to include a Capacity Proxy Price mechanism
10 ("CPP") as an option to be used, if needed, in the event that PJM Base Residual Auction
11 ("BRA") prices are not available at the time of the Companies' CBPs, as explained by
12 Companies' Witness R. Lee. Should the Companies need to exercise the CPP, any true-
13 ups between the CPP and actual capacity prices would be reconciled in Rider GCR until
14 an interim filing for Rider GEN is approved that reflects the actual capacity price.

15

16 **III. ESTIMATED CUSTOMER IMPACTS**

17 **Q. HAVE THE COMPANIES ESTIMATED THE BILL IMPACTS ON CUSTOMERS**
18 **FROM ESP V?**

19 A. Yes. Typical bills estimating the annual rate impacts of ESP V on non-shopping customers
20 are shown on Attachment DP-1.

1 **Q. WHAT ARE THE PRIMARY ASSUMPTIONS USED IN THE DEVELOPMENT**
2 **OF THESE ESTIMATED BILL IMPACTS?**

3 A. The “current bills” used as the starting point for the analysis rely on estimated annualized
4 tariff pricing for non-shopping customers as of May 31, 2024. These estimated prices are
5 based on current tariff pricing as of April 1, 2023, with updates for any pricing changes
6 that are known or able to be estimated, such as changes to Rider GEN to incorporate the
7 Companies’ most recent SSO auction results for generation prices to be effective for the
8 period June 1, 2023, through May 31, 2024, and revenue cap increases under Rider DCR.
9 The “estimated bills” for each year of ESP V include estimated impacts from the ESP V
10 proposals as well as any known changes to other riders. All other applicable tariff prices
11 as of May 31, 2024, are assumed to remain in effect during ESP V. These assumptions are
12 further described in Attachment DP-1.

13 **Q. DID THE COMPANIES INCLUDE ANY ASSUMPTIONS RELATED TO A**
14 **FUTURE BASE DISTRIBUTION RATE CASES?**

15 A. No. Since the Companies are filing a distribution base rate case in May 2024, the outcome
16 of that filing is not known at this time. Therefore, the Companies have not included any
17 impacts or changes from the upcoming base distribution rate case.

18 **Q. DID THE COMPANIES INCLUDE ANY ASSUMPTIONS RELATED TO THE**
19 **PENDING APPLICATION FOR PHASE TWO OF THE DISTRIBUTION GRID**
20 **MODERNIZATION PLAN?**

21 A. No. The application is still pending before the Commission and the outcome is currently
22 unknown. Therefore, the Companies have not included any assumptions in calculating the
23 typical bill projections.

1 **Q. ARE THESE ASSUMPTIONS REASONABLE?**

2 A. Yes. There are components of customer bills that include costs that are outside the
3 Companies' control such as SSO generation costs and non-market-based transmission
4 costs. For purposes of this analysis, it is reasonable to leave these and other rates flat to
5 isolate the estimated impacts of the new or modified provisions of ESP V.

6 **Q. PLEASE SUMMARIZE THE RESULTS OF YOUR ANALYSIS.**

7 A. The tables below show the estimated bill impacts for typical residential, commercial, and
8 industrial SSO customers for each of the Companies.

OE: Estimated Monthly Bill Impacts on SSO Customers
