Re: **Pre-Application Notification Letter
In the matter of the Letter of Notification Application of AES Ohio for a Certificate of
Environmental Compatibility and Public Need for the
Kiser Substation Interconnection Project
Ohio Power Siting Board Case No. 23-0260-EL-BLN**

Dear Chair French,

The Dayton Power and Light Company d/b/a AES Ohio files this Pre-Application Notification Letter for the above-referenced project pursuant to Rule 4906-6-03(A) of the Ohio Administrative Code (“OAC”).

AES Ohio is proposing the Kiser Substation Project (the “Project”), located in Adams Township, Champaign County, Ohio. The Project will provide interconnection between a 144 MW solar facility and the existing East Sidney – Quincy 138kV transmission line. AES Ohio will construct a new substation, of approximately 1.7 acres, named Kiser Substation. Kiser Substation will have a 4-breaker ring bus configuration and will be tied in to the East Sidney - Quincy 138kV transmission line, location approximately 0.1 miles from the new substation. Fiber for communication will also be installed. The interconnection customer will construct its own substation and a 138kV transmission line that would connect their substation to the proposed Kiser Substation.

In accordance with OAC Rule 4906-06-05, this Project falls within the Ohio Power Siting Board (OPSB) requirements for a Letter of Notification (LON) application.

AES Ohio anticipates that construction of the Project will begin August 31, 2023, pending approval of this Letter of Notification. The anticipated in-service date for the Project is March 1, 2024.

Please feel free to contact me if you have any questions regarding this notification letter.

Respectfully submitted,
/s/ Christopher C. Hollon
