RECEIVED-DOCKETING DIV

2023 JUN -9 AM 9:36

To Whom It May Concern,

PUCO

My husband and I are residents of Logan County. We both are in support of Fountain Point Solar Project in our county. We have had to stay in this week with windows because of poor air quality due to the out-of-control wildfires in Canada. Climate change impacts all of us. Unless we take the initiative to reduce our carbon footprint, the world will only be in a worse condition for the next generation. Opportunities such as Fountain Point Solar are a chance for our leadership to move into a more positive future. This project will make a difference long-term for the environment as well as providing much needed, more immediate revenue and employment for our county. It is a chance for Logan County to be a leader in renewable energy. Education, emergency services, libraries, and those seeking employment will all benefit. Tornadoes, wildfires, floods, changes to our growing season, drought - all of this is happening worldwide due to climate change. We vote YES for Fountain Solar Point. We respectfully request that you support this project for the benefit of our community.

Sincerely,  
Kim and Jon Doughty  
11032 Sassafras Road  
Lakeview, OH 43331
