"Very upset about the proposed increase. Our utility bills are already at an all time high, I went from a 35.00 a month light bill to averaging 125.00-130 a month, these are the summer bills which usually run low. I have only used my air conditioner 5 times during the summer. We are normally not at home during the day and still paying very high light bills. I strongly believe you all are poorly managing the money you are collecting from your customer, over charging the consumers and holding us hostage with these overpriced utilities because you know for most of us they are a necessity. I strongly oppose rate increase and ask that you please take a closer look at your budge and revisit your options you have (contractors) for getting the work done."
