Exhibit C-1

Financial Reporting

Think Energy, LLC ("Think Energy") is not required to file Form 10-K because it does not meet the conditions listed under Section 13 or 15(d) of the Securities Exchange Act of 1934. Neither Think Energy nor its affiliates are publicly traded companies.

Exhibit B-3

Disclosure of Liabilities and Investigations

As noted in its 2021 bi-annual renewal filing, in 2017, Think Energy was instructed by the Maine Public Utilities Commission (the “MPUC”) to stop marketing in a utility service area that was not included in Think Energy’s original license application. Although there were two utilities operating in Maine with “Bangor” in the name, Think Energy was only licensed to operate in one of the utilities containing the name “Bangor”. The error was due to incorrect zip codes in Think Energy’s systems and was rectified within one day of the MPUC’s notice to Think Energy.

In 2017, a staff member from the Public Utilities Commission of Ohio (the “Commission”) instructed Think Energy to cease natural gas marketing. The Commission’s instruction was lifted, and Think Energy resumed natural gas marketing in Ohio.

As stated in Think Energy’s 2019 license renewal package, in Ohio in 2018, Think Energy was required by PUCO to cease door-to-door marketing as a result of a regulation misinterpretation. Think Energy mistakenly understood that the PUCO rules specifically addressing door-to-door sales completely covered all consent requirements. Think Energy did not interpret the regulations to include the general rules for mailing, facsimiles and direct enrollments to be in addition to the door-to-door rules. Due to this misunderstanding, Think Energy believed that its’ obtaining third party verifications for all door-to-door sales was sufficient. Think Energy acknowledged its good faith mistake and corrected the mistake to be in compliance with the regulation, and the matters raised by staff were fully addressed to the satisfaction of PUCO.

On July 1, 2021, new legislation became effective in Connecticut, which prohibited an electric supplier from “requir[ing] a residential customer to pay any fee for termination or early cancellation of a contract.” The Company did not bill any residential customers for early termination fees (“ETFs”) on or after the effective date of the legislation. However, due to a system design error, the amount of the ETFs in effect prior to July 1, 2021, still appeared in the summary information about electric generation supply on residential customer bills. On May 17, 2022, the Company entered into a settlement agreement with the Office of Education, Outreach and Enforcement (the “EOE”) of the Public Utilities Regulatory Authority of Connecticut (“PURA”) in which the Company agreed to provide credits to 102 customer accounts. On May 23, 2022, PURA approved the settlement agreement.

On November 7, 2022, the EOE notified the Company that the electricity rates on the Company’s website—www.thinkenergy.com—did not match the rates listed on Connecticut’s state electricity shopping site, www.energizect.com (the “Rate Board”). By Decision dated November 5, 2014, in Docket No. 13-07-18, PURA Establishment of Rules for Electric Suppliers and EDCs Concerning Operations and Marketing in the Electric Retail Market, websites belonging to electric suppliers must “list and provide information concerning all generally available offers . . . [T]he Rate Board must align with all generally available offers on the supplier’s website.” Decision, pp. 12 and 13. By November 10, 2022, the Company aligned the Rate Board and the Company’s website. Due to a change in personnel arising from the transition of the Company’s ownership, offers were not uploaded to the Rate Board and the Company’s website

simultaneously. The Company and the EOE completed negotiations regarding a settlement, which was subsequently approved by PURA on December 1, 2022.
