Re: Oak Run Solar Project, 22-0549-EL-BGN

Oak Run Solar Project creates incredible opportunities to push the envelope on what farming practices are possible between the rows of solar panels. This project is going to be the largest in Ohio, and Savion is quickly emerging as a leader in the field of agrivoltaics. There will certainly be challenges to an operation like this, but that shouldn't stop us from pursuing it. In fact, farmers have always overcome obstacles and continue to increase yields and find more and more ways to be resourceful. This is an opportunity to show the rest of the country that solar farms can also be crop farms – on the same land. I'd like this project to move forward so we can embrace it as the first and one of the largest agrivoltaics projects that can set the standard for others to follow.
