To Ohio Power Siting Board.

PUCO

I do not want Samsung  
Richwood Solar Project Approved.

They have been a big pain in  
the ass. I told them I was not  
interested to start with, to get lost  
and they keep coming back as there  
are high tension wires on land I own  
and some I farm. I ran them off  
many times by telling them they  
were trespassing when they were  
on properties. I had to tell them to  
leave or be arrested by Sheriff.

Sheriff Deputy I know had many  
work calls to answer at York Center  
too, for that I also project.

Land I own is right by  
where they want to put sub station  
and other farm I own is by battery  
storage. It will hurt value of  
both tracts of my land. Battery  
Station as I understand where it  
is to be, is not far from open ditch  
in one that goes direct to Bokes Creek,  
so how well they keep battery acids  
away.

One tile line is a 12" that  
is 18" in one where it goes in open  
ditch to Bokes Creek. That tile has  
seven houses on it to drain.

as well 60 to 80 acres. Bedent and Tuller have tile going through their property they signed up with Samsung in 6" to 8" tile that will affect 50 to 60 more acres. Then there is another 12" tile in another farm I do I think will be affected that drains 70 plus acres and 2 houses. Then I have another farm where a open ditch was just done that may or may not be bothered. I don't trust Union County soil and Water to be sure these tile will be all fixed right by Samsung. Solar project at York Center you can drive by and see someone not for that solar project.

My other thing against these projects is my tax dollars being wasted by politicians with grants for solar. Ohio 47th in the amount of sunshine in the United States, so it is stupid to be in Ohio anyway. We have lot of Natural gas to make dependable energy without solar.

What happens when these companies file Bankruptcy when grants are all gone and no free money left for them to pocket. They will leave them stand and Bonds will be gone when the technology gets old and  
over next page. 3

is outdated. I state of Ohio didn't make my life insurance company stay in business a few years ago and I had a worthless policy when they sold it, so what will be different with solar bonding money deal.

I would also like to know what happens if we have a bad hail storm to solar panels, I will guess they will break.

I am totally against this project so please vote no.

Thank You  
John Hull
