RE: Prairie Flyer Energy Storage, OPSB Case No. ~~23-1045-EL-BGN~~

Dear Chairwoman French:

The Ohio Chamber of Commerce submits this letter in support of the renewable energy development project in Montgomery County, the Prairie Flyer Energy Storage Project. Prairie Flyer EnergyStorage, LLC a wholly owned subsidiary of Jupiter Power is the development company.

The Energy Storage Project has many benefits for the local community in Montgomery County including the City of Vandalia where the project is located on 7 acres of land. The project will not only provide jobs and tax benefits to residents but will benefit economic development with reliable energy supply to lessen any disruption in power or prevent dips in voltage to protect operations of advanced manufacturing and technological activities of nonmanufacturing operations. The batteries will store energy and connect to the existing DP&L Vandalia 69 kV substation.

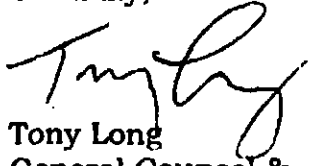

The Ohio Chamber believes that the Prairie Flyer Energy Storage Project fits the Ohio Power Siting Board criteria for approval. A recent OPSB Staff Report recommends that the Board approve the Applicant's request for a certificate of environmental compatibility and public need

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

Technician PC Date Processed 2/7/24

Therefore, the Ohio Chamber urges your approval of the project's certificate application.

Cordially,

A handwritten signature in black ink, appearing to read "Tony Long". The signature is fluid and cursive, with the first name "Tony" being more prominent than the last name "Long".
