My house borders the Samsung Project and I'm asking you to please not allow this project to go through. My concerns have alot to do with ruining the landscape that surrounds this project. The wildlife will be displaced, I see alot of wildlife that goes through these fields. My other concern would be the pounding in the ground of the spikes. My house would not survive this kind of destruction. My house sits on a rock foundation and would surely shift. The tiles in these fields are very old and noone knows where they are located resulting in flooding.
