THE OHIO POWER SITING BOARD**

In the Matter of the Application of Chestnut)	Case No. 22-0988-EL-BGN
Solar, LLC for a Certificate of Environmental)	
Compatibility and Public Need to Construct)	
and Operate the Chestnut Solar Project)	
)	

**CHESTNUT SOLAR, LLC'S RESPONSE TO
STAFF'S SIXTEENTH SET OF DATA REQUESTS**

Chestnut Solar, LLC hereby responds to the sixteenth set of data requests from Staff.

RESPONSE TO DATA REQUEST

Sixteenth Set of Data Requests – Inverters

- 1) The SMA Utility Power System and Sunny Central 2500 depicted in Exhibit B (Manufacturer Specifications) seem to be self-contained units. Also, Exhibit A (Preliminary Site Plan) shows 19 inverter locations. Please further explain this statement from page 26 of the Application which reads "Up to six inverters will be placed on a single skid that provides the foundation for the inverters, transformer, equipment cabinet, and Supervisory Control and Data Acquisition (SCADA) system." This statement seems to imply that only 4 locations sitewide would be needed for the 19 inverters.

RESPONSE: Based on the current layout of the site, each medium-voltage pad/skid can accommodate up to 6 - 840 kw inverters (5040kw total per) in addition to the equipment referenced (SCADA, transformers, etc). Upon final equipment selection, Chestnut Solar will optimize the configuration at each pad/skid.

Respectfully submitted,

/s/ Devan K. Flahive
