To the Ohio Power Siting Board,

I am writing to urge your support for the Richwood Solar project (Case #23-0930-EL-BGN). The Richwood Solar project would benefit Union County and Ohio by adding to our domestic energy production capacity, creating construction jobs along with long-term local jobs, increasing funding to local schools and services, boosting the local economy, and helping preserve farmland for generations to come.

The energy produced by Richwood Solar will reduce emissions while at the same time producing enough clean energy to power the equivalent of over 46,000 homes in Ohio.

It is clear that Richwood Solar will benefit Union County. Please support the project and invest in Ohio's future.

I have a personal solar array on my residence. It works great and I believe that solar electrical generation would benefit the area as it has benefitted myself.

Sincerely,

Deborah Tanaka
