DESCRIPTION OF DATA SERVICES AND RATES

2. **Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS)**

(N)

For Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) provided entirely within the State of Ohio, Verizon North Inc. assents to, adopts and concurs in the rates, rules and regulations as they are set forth in Verizon Telephone Companies Tariff FCC No. 20, Part II, Section 5.10, Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS), as it now exists or as it may be revised, added to or supplemented by superseding sheets or issues.

EXHIBIT C-1

NEW SERVICE PROPOSALS

Verizon North Inc. proposes to introduce Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) which provides a fast packet switching service for high speed networks which require flexible bandwidth, high-performance transport and switching for connectivity between and among widely distributed customer locations.

On February 25, 2003, Verizon Telephone Companies filed Transmittal No. 295 to its Tariff FCC No. 20, Communications Services Tariff, to grandfather its various existing interstate ATM offerings and introduce ATM CRS in order to create a uniform product across the Verizon footprint. As a result of DSL deployment within the state, Verizon North Inc. now has facilities in place to also provision ATM CRS and proposes to concur in the new interstate service offering for intrastate applications.

STANDARDS FOR NEW SERVICE PROPOSALS

- 1) Q. A statement of the type of customers to which it is targeted.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) is targeted to dedicated network data customers.
- 2) Q. A statement of how the service benefits the public interest.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) benefits the public interest by providing advanced data alternatives for high speed networks.
- 3) Q. If new equipment is involved, a description (preferably with a manual or picture, brochure, etc.) and where appropriate, a statement of how the proposed service differs from existing services.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) will not require the deployment of new equipment.
- 4) Q. If the proposed service results from customer requests, a statement of to that effect, giving if available, the number and type of customers requesting this proposed service.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) is not the result of customer requests.
- 5) Q. If the new service is proposed on an experimental basis, explain why and support the time period requested for the experiment.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) is not proposed on an experimental basis.
- 6) Q. If the new service is proposed for a limited geographic area, such as an exchange area, LATA, city, etc., explain why and support the area chosen.
A. Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) will be implemented statewide.
- 7) Q. Explain when the telephone utility will be prepared to offer the service, as well as when the telephone utility proposes to make the service known to its customers.
A. Verizon is prepared to offer Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) upon Commission approval of this application.
- 8) Q. Explain how customers are to be informed of the availability of the new service offering.
A. Customers will learn of Asynchronous Transfer Mode (ATM) Cell Relay Service (CRS) through normal channels of communication.
