Project Name:

Case No. 00-925-GA-BLN

Rialto Road Pressure
Improvement - Phase II

0007

Company Name:

Date of Inspection:

Cincinnati Gas & Electric Company

23 August 00

Field Visit: J. O'Dell, ^{also} R. Strom, J. Gould

Project Description: This project involves the installation of approximately 14,000 feet of natural gas transmission line. The pipeline has an outside diameter of 12 inches. This project constitutes the second phase of a transmission line improvement previously approved under Case Number 98-946-GA-BLN. The project will help provide adequate pressure for the natural gas distribution system around the I-75 Union Centre interchange. The Applicant was granted approval for the balance of this project on July 14, 2000. To accommodate local transportation engineers and officials, the Applicant has requested a minor route revision.

Site Description: The project area is located in Union Township, Butler County. Land use in proximity to the alignment change is experiencing rapid commercial and light industrial development. The pipeline will be installed in a ten-foot wide utility easement, approximately 25 to 35 feet from the south edge of Lakota Drive. The Applicant will employ directional boring technology to avoid damage to Union Centre Boulevard and Lakota West High School's driveways.

Comments/Concerns: The construction of this route revision should pose only minimal negative social and environmental impacts.

Disposition: Approval X Disapproval
