July 3, 2003

Ms. Daisy Crockron
Docketing Division Chief
The Public Utilities Commission of Ohio
180 East Broad Street
Columbus, Ohio 43215-3793

03-1303-TP-ATA

Dear Ms. Crockron:

Attached are revised tariff pages to replace those pages originally filed on June 6, 2003 with Cincinnati Bell Telephone Company's (CBT's) Application requesting an order for authorization to revise its *Out of Territory Services Tariff, PUCO No. 1*, Section 6, Access Service to *introduce an Long Haul circuit rate element*.

The revisions in the attached pages are based on PUCO staff requests.

Please date-stamp and return the enclosed duplicate of this transmittal to acknowledge its receipt. Please refer any questions to Mike Bishop on 513-397-1231.

Sincerely,

Michael E. Bishop
Senior Manager - Switched Access &
Regulatory

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General7.1.2 Rate Categories (Cont'd)(B) Channel Mileage(cont)

(N)

The Long Haul rate provides for the transmission facilities of over 40 miles between either: (1) a serving wire center located within the Company's service area and a Point-of-Presence (POP) designated by the Company located outside the Company's service area, or, (2) two POPs assigned by the Company located outside the Company's service area.

(N)

(C) Optional Features and Functions

The Optional Features and Functions rate category provides for optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, they will be charges for as a single rate element.

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements

A hub is a Company designated serving wire center at which bridging, multiplexing or Customer Network Reconfiguration Service functions are performed. The bridging functions performed are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth.

Descriptions for each of the available Optional Features and Functions are set forth in 7.2 following.

Issued: June 6, 2003

Effective: July 6, 2003

In Accordance with Case No. 00-784-TP-ATA,

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 OC-3 Service, OC-12 Service, and OC-48 Service - Point-to-Point Service (Cont'd)(B) Channel Configuration (Cont'd)(2) Channel Mileage (Cont'd)

OC-3 CTs are interconnected to OC-3 transport.
 OC-12 CTs are interconnected to OC-12 transport.
 OC-48 CTs are interconnected to OC-48 transport.

In addition, Channel Mileage can be connected between wire centers with Add/Drop multiplexing at a lower OC-N speed than the CT, if the transport is between a lower speed Add/Drop Function and:

- another lower speed Add/Drop Function;
- another lower speed Channel Termination;
- a lower speed Dedicated Ring Port;
- a lower speed Cross-Connect.

All of the above terminations must be the same speed as the Channel Mileage.

The Long Haul rate provides for the transmission facilities of over 40 miles between (1) a serving wire center located within the Company's service area and a Point-of-Presence (POP) designated by the Company located outside the Company's service area or, (2) two POPs assigned by the Company located outside the Company's service area. (N)

(3) Optional Features and Functions

The following optional features and functions are available: Add/Drop Multiplexing, Add/Drop Function, OC-3, OC-12 and OC-48 Cross-Connection, 1+1 Protection with Route Survivability, 1+1 Protection with Central Office Survivability, and OC-48 Regenerator. (N)

(a) OC-3, OC-12 and OC-48 Add/Drop Multiplexing

An arrangement that allows an OC-3, OC-12 or OC-48 channel operating at a terminating speed of 155.52 Mbps, 622.08 Mbps and 2488.32 Mbps, respectively, to add/drop a lower speed channel by using this feature along with the add/drop function as stated in (b) following.
