PUCO

November 25, 2005

Ohio Public Utilities Commission
180 East Broad Street
Columbus, OH 43215

Subject: Case No. 05-1306-AU-COI

To Whom It May Concern:

I am writing to voice Lancaster Municipal Gas' strong support to have O.U.P.S. designated by the PUCO as the "811 One Call System" in Ohio.

Lancaster Gas has utilized O.U.P.S.'s services for many years and found their system and employees to be absolutely first rate. O.U.P.S. is the most important and effective part of our pipeline protection program as it pertains to preventing third party damage. O.U.P.S. has proven to be reliable, timely, and consistently accurate in their handling of dig requests. Their educational programs have contributed much regarding awareness within the public and excavation industry for the need to "Call Before You Dig".

I cannot imagine what our day-to-day operations would turn into without the excellent services that O.U.P.S. provides.

Sincerely,

A handwritten signature in black ink that reads "Mark G. Morgan".

Mark G. Morgan
Assistant Superintendent
Lancaster Municipal Gas

Dear Sir or Madam:

The Village of Oak Harbor is a member of the OUPS (Ohio Utilities Protection Service) system. We would ask that the Ohio Public Utilities Commission support OUPS as the "811 One Call System" designate in Ohio.

Most municipalities, as well as the private sector, within the State of Ohio use the OUPS system to locate and protect the various underground utilities. The Ohio Oil & Gas Association (OOGA) covers only private oil and gas wells and is not available to the general public. For this reason, please consider the OUPS system as the only practical one-call system within the State of Ohio.

Yours,

John Liske
Village Administrator
