Ms. Daisy Crockron - Chief
Docketing Department
The Public Utilities Commission of Ohio
180 East Broad Street - 10th Floor
Columbus, OH 43215-3793

Transmittal Letter
Revised Tariff Sheets Filed Pursuant to the
Commission's Order in Case No. 83-464-TP-COI
and
Case No. 90-5023-TP-TRF

Dear Ms. Crockron:

Revised tariff sheets have been filed with the FCC to amend GTOC Tariff FCC No. 1, Facilities for Interstate Access, in which GTE North Incorporated concurs for intrastate applications.

In accordance with your Commission's Order in Case No. 83-464-TP-COI, we are filing four (4) copies of these revised tariff sheets.

Transmittal No. 1224 - Effective November 6, 1999

This filing expands the existing Incremental SONET Access Service offering to include Custom Connect CDL Link with Optical Cross Connect in bandwidths of OC3, OC3c, OC12 and OC12c.

Acknowledgement and date of receipt of this filing is requested.

Sincerely,

John W. Kennedy
Assistant Vice President-Regulatory
and Governmental Affairs

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)

16.3 Frame Relay Service (Cont'd)

(E) Rate Regulations (Cont'd)

(2) Rate Elements

(a) Frame Relay UNI Port and Access Line

A nonrecurring charge and a monthly rate, based on the speed of the port connection (i.e., 56/64 Kbps, 384 Kbps or 1.544 Mbps), apply per port for each physical connection to the network supporting Frame Relay Service. Each port can accommodate multiple paths (PVCs). Clear channel capability, as necessary, (T) is included at no additional charge. (T)

(b) Frame Relay UNI or NNI Port only

A nonrecurring charge and a monthly rate, based on the speed of the port connection (i.e., 56/64 Kbps or 1.544 Mbps), apply per port for each Frame Relay Access Line or digital private line connection to the network supporting Frame Relay Service. Each port can accommodate multiple paths (PVCs).

(1) Network-to-Network Interface (NNI) Port Only.

The NNI port configuration is used for connecting two networks together for bidirectional messaging. Access facilities are available from Section 5.

(2) User-to-Network Interface (UNI) Port Only.

The UNI port provides for a user to carrier connection (i.e., end user customer to GTE). Access facilities are available from Section 5.

(c) Frame Relay PVC CIR Capacity

A monthly rate applies for the PVC CIR capacity for each port requested by the customer.

(d) Frame Relay to ATM Conversion

A monthly rate applies, based upon CIR ordered, for each PVC interworked to an ATM service. This charge is in addition to the Frame Relay PVC CIR Capacity rate element.

(3) Rate Application

A customer may access Frame Relay Service via a Frame Relay Access Line or via Telephone Company provided digital access facilities offered under Section 5. If a customer utilizes a special access line to access FRS, the associated regulations, rates and charges for such facilities shall apply in addition to the rates and charges associated with the FRS rate elements.

A customer utilizing special access facilities to access FRS would incur the monthly rate and nonrecurring charge associated with the Frame Relay UNI or NNI Port Only charge set forth under 16.3(F)(1)(b) or 16.3(F)(1)(c) respectively for standard arrangements. The UNI Port provides for a user to frame relay switch connection; the NNI Port provides for a frame relay switch to frame relay switch connection.

The Frame Relay Port (unbundled or bundled with an access line) and its associated PVC segment(s) may be ordered and billed separately from an associated frame relay port and PVC and can have different Controllers, as discussed under 16.3(B). A request by one customer to discontinue a PVC does not result in the disconnection of the Frame Relay Access Line and Port. Only the Controller of a Frame Relay Access Line may authorize a disconnect of that line.

FACILITIES FOR INTERSTATE ACCESS

20. SONET ACCESS SERVICES (Cont'd)

20.3 Incremental SONET (Cont'd)

(C) Application of Rates and Charges (Cont'd)

(1) CONNECT (Cont'd)

(j) Custom Connect (Cont'd)

CDL Link

The CDL Link rate element is applicable for each customer designated location in which the customer requests the ability to add/drop traffic. The CDL Link is offered as Single Route, Diverse Route or Ring Route and may be ordered with or without Telephone Company provided electronics as OC3, OC12 or OC48 bandwidth capacity. Only one CDL Link per connect may be ordered without electronics.

The CDL Link may also be ordered as OC3c or OC12c Single Route or Diverse Route with Telephone Company provided electronics. OC3c and OC12c rider charges are included in the monthly rate for OC3c and OC12c CDL Links.

If more than two Links or Nodes are ordered on the same order, the CDL Link must be ordered as a Ring Route CDL Link. A Custom Connect ordered via a ring topology will be provided with a service guarantee as shown in 2.4.4(A)(8).

The CDL Link may be ordered under a one (1) year, three (3) year, five (5) year or seven (7) year SPP.

CDL Link with Optical Cross Connect

The CDL Link with Optical Cross Connect provides the communications path between the Telephone Company provided electronics and a customer's transmission equipment and facilitates where the customer is provided EIS as defined in Section 17. This rate element includes the CDL Link from the fiber optic terminal and the optical jumpers to facilitate the cross connect to the customer's transmission equipment and facilitates within the Telephone Company wire center.

The CDL Link with Optical Cross Connect will be provided as single route without telephone company provided electronics as OC3, OC3c, OC12 or OC12c as ordered by the customer.

In addition to the rate for the CDL Link with Optical Cross Connect, the appropriate CDL Link rate element is applicable from the customer-designated location to the serving wire center.

The CDL Link with Optical Cross Connect may be ordered under a one (1) year, three (3) year, five (5) year or seven (7) year SPP.

Rates for the CDL Link with Optical Cross Connect are shown in 20.3 will apply in addition to other charges specified in Section 17.

(C) Application of Rates and Charges (Cont'd)

(1) CONNECT (Cont'd)

(j) Custom Connect (Cont'd)

Transport

Transport may be ordered as shared or dedicated. Shared Transport is applicable when the transport between nodes and/or Links is ordered at different bandwidth levels. The Dedicated Transport is applicable when transport between the Nodes and/or Links is of the same bandwidth level. (M)

Shared Transport may be ordered in bandwidths of DS1, DS3/STS1, OC3/STM1, E1 or OC12. In Hawaii, shared interisland transport may be ordered for DS3, OC3 and OC12 bandwidths. Dedicated Transport may be ordered in bandwidths of OC3, OC12 or OC48. The transport is mileage sensitive and will be calculated based on the V&H coordinates of the wire centers comprising each segment of the connect with the exception of shared interisland transport which is non-distance sensitive. The meet point billing mileage calculation is specified in 2.7.3. The customer has the option to subscribe to Band SONET Transport in place of Customer Connect Shared Transport.

The Transport is provided at a flat-rated monthly recurring charge.

Rider

The Rider is the customer's service(s) traversing the CDL Link. Riders may be provided at DS1, DS3, OC3c, OC12c, STS1, E1 or STM1 bandwidth levels as required by the customer.

The Rider is provided at a flat-rated monthly recurring charge which includes add/drop multiplexing and is applicable per rider circuit with the exception of OC3c and OC12c CDL Links. Express Connect and Flex Express Connect. (M)
