RE: Amended Private Line Tariff Revision of Time Warner Telecom of Ohio, LLC - PUCO Tariff No. 5

Dear Ms. Jenkins:

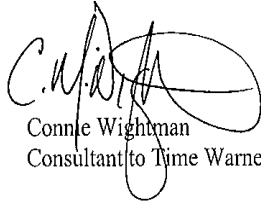

Enclosed for filing please find one original and ten (10) copies of the amended private line tariff revision submitted on behalf of Time Warner Telecom of Ohio, LLC's private line tariff No. 5. This amended filing incorporates changes requested by staff. In response to Staff's question pertaining to Page 53.3 last paragraph... "Additional port charges may apply". All pricing is done on an individual case basis. This filing was dated to become effective on June 23, 2006.

The following amended tariff pages are included with this filing:

1st Revised Page 37 Revises references to MTSS Rules;
2nd Revised Page 53.3 Incorporates minor text change / correction;
Original Page 53.7 Incorporates minor text change / correction.

Any questions you may have regarding this filing may be directed to my attention at (407) 740-3002 or via e-mail at cwightman@tminc.com. Please acknowledge receipt of this filing by date stamping the extra copy of this cover letter and returning it to me in the self-addressed, stamped envelope provided for this purpose. Thank you for your assistance.

Sincerely,

Connie Wightman
Consultant to Time Warner Telecom of Ohio, LLC

SECTION 2 - REGULATIONS *Cont'd.*

- 2.14 Service Level Standards and Allowances for Interruptions in Service (T)
- 2.14.1 General Rules (T)
- A. Interruptions in service, which are not due to the negligence of, or willful acts of, or noncompliance with the provisions of this tariff by, the Customer or an Authorized User, or the operation or malfunction of the facilities, power or equipment provided by the Customer or Authorized User, will be credited to the Customer in accordance with MTSS Rule 4901: 1-5-16 and Rule 4901:1-5-20. (T)
- B. A credit allowance will be made when an interruption occurs because of a failure of any component furnished under this tariff. An interruption period begins when the Customer reports a service, facility or circuit to be interrupted and releases it for testing and repair. An interruption period also begins when the Company detects that the service facility or circuit is impaired and the Customer releases it for testing and repair. The Customer shall make reasonable attempts to ascertain whether the interruption is caused by Customer-provided or Authorized User-provided facilities. An interruption period ends when the service, facility or circuit is operative. If the Customer reports a service, facility or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted. (T)
- C. For calculating credit allowances, every month is considered to have thirty (30) days. A credit allowance is applied on a pro rata basis against the rates specified hereunder and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit. (T)

SECTION 3 - SERVICE DESCRIPTIONS *Cont'd.*

3.4 High Capacity Transmission Services *Cont'd.*

3.4.8 Native Local Area Network (NLAN Services) *Cont'd.*

E. Enterprise Switched Native Local Area Network (SNLAN) Service (T)

1. Service Description

Enterprise SNLAN Service is a switched Ethernet Service that allows the Customer to access a shared network infrastructure to connect multiple Customer locations in a mesh configuration through standard IEEE 10M, 100M or 1000M Ethernet ports. Multiple Customers traverse the shared physical network infrastructure with traffic from each Customer differentiated from that or another Customer through unique, secure logical connections. (T)

Enterprise SNLAN Service is designed to accommodate both Untagged Customer Ethernet traffic as well as Tagged Customer Ethernet traffic across the Company's network. Customers may select Individual Tag Service (ITS) option or the Unlimited Tag Service (UTS) option. (T)

Individual Tag Service Option:

With ITS, the Customer pays per Tag for each of the Tags they wish to transport across the network specific VLAN Tag numbers are available to Customers on a first-come, first served basis.

Unlimited Tag Service Option:

The Unlimited Tag Service Option allows the Customer to transport as many VLAN Tags and any VLAN Tag numbers desired across the Company network. Additional port charges may apply. This service is also referred to as Unlimited Switched NLAN (USNLAN) service.

3.4 VPN Access Service

(N)

This service provides an isolated, segmented virtual tunnel between two points on the Company's network. This is a routed connection and requires that the two end points are capable of Network Layer decisions and are on different subnets. The Customer is responsible for providing CPE at its locations. The Customer must purchase a transport product to use this service.

3.4.1 VPN Access Service Maximum Rates and Charges
