TELEPHONE SERVICE REQUIREMENTS FORM

Pursuant to Case Nos. 99-998-TP-COI and 99-563-TP-COI

The provider affirms that it is in compliance with Commission directives concerning the following checked items, and that this represents an up-to-date listing of applicable "generic" service requirements. The provider understands that this in no way supersedes the context of the applicable Commission orders described below. Unless otherwise specified, this language replaces the need for related language to be contained in the provider's tariff.

A. MANDATORY REQUIREMENTS FOR BASIC LOCAL EXCHANGE AND CTS PROVIDERS (unless otherwise noted):

☒ 1. **SALES TAX** (See also Case No. 87-1010-TP-UNC)

Certain telecommunication services, as defined in the Ohio Revised Code, are subject to state sales tax at the prevailing tax rates, if the services originate, or terminate in Ohio, or both, and are charged to a subscriber's telephone number or account in Ohio.

☒ 2. **MTSS TARIFF REQUIREMENTS**

☒ The provider attests that its tariffs include:

- ☐ provider-specific language addressing the deposit method (as cited in 4901:1-5-13) adopted by the company and approved by the Commission;
- ☐ Toll Caps (choose one): N/A
 - ☐ language addressing the provider-specific parameters of toll caps approved by the Commission, OR
 - ☐ not applicable since the provider has not chosen to incorporate toll caps.
- ☐ language regarding establishment of service, including requirements to establish creditworthiness, as cited in 4901:1-5-13;
- ☐ language regarding residential service guarantors, as cited in 4901:1-5-14;
- ☐ language regarding subscriber bills, as cited in 4901:1-5-15;
- ☐ language regarding subscriber billing adjustments for local exchange service, as cited in 4901:1-5-16; and,

- language regarding denial or disconnection of local and/or toll service, including the requirements for the reconnection of local and/or toll service, as cited in 4901:1-5-17.

Check the boxes below to attest that the provider shall adhere to the following criteria when the provider implements cancellation of service policies and/or requests an advance payment:

☒ Cancellation of Service:

When a customer cancels an application for service prior to the start of service or prior to any special construction, no charges will be imposed except for those specified below:

Where the company has notified a customer or prospective customer of the possibility that special expenses may be incurred in connection with provisioning the customer's service, and then the company does incur such expenses. Expenses could include special construction, or where special arrangements of facilities or equipment have begun before the company received a cancellation notice. The charge will be equal to the costs actually incurred, less net salvage;

☒ Advance Payment:

Advance Payment means a payment that may be required by the company as a means of being compensated for extraordinary expenses, including, but not limited to, special construction costs associated with a particular service installation.

☒ 3. **SURCHARGES**

The company shall not assess separately any taxes, fees or surcharges, other than government-approved sales taxes imposed directly on the end users, without seeking Commission approval under the appropriate procedures required by the Commission. Generally, the Commission will not grant the inclusion of gross receipts tax as a separate item on the bill unless special circumstances so warrant and the Commission specifically approves same. The company shall not place a separate line item on a customer's bill without sending notice to all customers informing them of the new line item charges in accordance with Commission-adopted notice procedures.

The customer is responsible for the payment of all state, local and E9-1-1 taxes, surcharges, utility fees, or other similar fees for which the end user is directly responsible and that may be levied by a governing body or bodies in conjunction with or as a result of a service furnished under a tariff on file with the Public Utilities Commission of Ohio. These charges may appear as separate line items on the customer's bill, as opposed to being included in the rates contained in a tariff. Any such line item charges will be reflected in the company's tariff.

☒ 4. **1+ INTRALATA PRESUBSCRIPTION – Basic Local Exchange Providers Only** (See Also Case No. 95-845-TP-COI, Guideline X.)

a. General

IntraLATA Presubscription is a procedure whereby a subscriber designates to the Telephone Company the carrier which the subscriber wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

IntraLATA Presubscription will become effective upon the initial offering of certified local exchange service.

b. IntraLATA Presubscription Options

Option A: Subscriber may select the Telephone Company as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option B: Subscriber may select her/his interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option C: Subscriber may select a carrier other than the Telephone Company or the subscriber's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription.

Option D; Subscriber may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the subscriber to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

c. Rules and Regulations

Subscribers of record will retain their current dialing arrangements until they request that their dialing arrangements be changed.

Subscribers of record or new subscribers may select either Options A, B, C, or D for intraLATA Presubscription.

Subscribers may change their selected Option and/or their presubscribed intraLATA toll carrier at any time subject to charges specified in Paragraph E, below.

d. IntraLATA Presubscription Procedures

New subscribers will be asked to select an intraLATA toll carrier(s) at the time the subscriber places an order to establish local exchange service with the Telephone Company. The Telephone Company will process the subscriber's order for intraLATA service. The selected carrier(s) will confirm their respective subscribers' verbal selection by third-party verification or return written confirmation notices. All new subscribers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new subscriber is unable to make a selection at the time the new subscriber places an order to establish local exchange service, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection. If selection is still not possible, the Telephone Company will inform the subscriber that he/she will be given 90 calendar days in which to inform the Telephone Company of an intraLATA toll carrier presubscription selection free of charge. Until the subscriber informs the Telephone Company of his/her choice for intraLATA toll carrier, the subscriber will not have a presubscribed intraLATA toll carrier, but rather will be required to dial a carrier access code to route all intraLATA toll calls to the carrier(s) of choice. Subscribers who inform the Telephone Company of a choice for intraLATA toll presubscription within the 90-day period will not be assessed a service charge for the initial subscriber request.

Subscribers of record may initiate an intraLATA presubscription change at any time subject to the charges specified in e.ii. below. If a customer of record inquires of the Telephone Company of the carriers available for intraLATA toll presubscription, the Telephone Company will read a random listing of all available intraLATA carriers to aid the subscriber in selection.

☒ 2. **EMERGENCY SERVICES CALLING PLAN**

Applicable to all CLECs and CTSs offering MTS (See also Case Nos. 85-1466-TP-COI and 89-54-TP-COI):

Message toll telephone calls to governmental emergency service agencies, as set forth in (a) following, having primary or principal responsibility with respect to the provision of emergency services to persons and property in the area from which the call is made, meeting the definition and criteria of an emergency call as set forth in (b) following, are offered at no charge to customers:

- a. Governmental fire fighting, Ohio State Highway Patrol, police, and emergency squad service (as designated by the appropriate governmental agency) qualify as governmental emergency service agencies provided they answer emergency service calls on a personally attended (live) 24-hour basis, 365 days a year, including holidays.
- b. An emergency is an occurrence or set of circumstances in which conditions pose immediate threat to human life, property, or both, and necessitate that prompt action be taken. An emergency call is an originated call of short duration to a governmental emergency service agency in order to seek assistance for such an emergency.

☐ 3. **ALTERNATIVE OPERATOR SERVICES**

The following applies to the provision of alternative operator services (AOS) including Inmate Facility Services. (See, also, Case No. 88-560-TP-COI, December 30, 1991 Supplemental Opinion and Order and February 27, 1992 Entry on Rehearing):

Preceding the maximum operator-assisted surcharges set forth in the text of the proposed tariff, as well as preceding the operator-assisted surcharges set forth in the price list attached to the proposed tariff, the service provider must insert a statement which specifies whether the rates as set forth apply to the provider's provision of traditional operator services, alternative operator services (AOS), or both.

(A) Definitions

- (1) AOS are those services provided by the provider in which the customer and the end user are totally separate entities. The provider contracts with the customer to provide the AOS; however, the provider does not directly contract with the end user to provide

the services even though it is the end user who actually pays for the processing of the operator-assisted calls. These do not include coin-sent calls.

- (2) Traditional operator services are those services provided by the provider in which the end user has a customer relationship with the provider, the provider contracts with the customer/end user to provide the services, and the customer/end user pays for the actual processing of the operator-assisted calls.

(B) AOS Service Parameters

- (1) Local operator-assisted calls:

For local operator-assisted calls, both live and automated, the AOS provider shall not charge the billed party more than the ILEC's price list rates for traditional local operator-assisted calls in the same exchange. This requirement includes both the local usage rate (either flat-rate per call or a minute-of-use rate per call) and applicable operator surcharges. The minutes-of-use rate for a local call shall be no higher than the rates for MTS identified in paragraph (B)(2), below.

- (2) MTS provided in conjunction with AOS:

For intraLATA and interLATA, intrastate toll service calls, each AOS provider must apply one of the following MTS price ceilings to the MTS provided in conjunction with AOS:

Mileage Band	Initial Minute	Each Additional Minute
1 - 10	.32	.16
11 - 22	.40	.22
23 - 55	.48	.28
56 - 124	.57	.37
125 - end	.58	.39

or;

- (3) For intraLATA and interLATA, intrastate toll service calls, each AOS provider's maximum operator-assisted rates shall be no more than:
- (a) \$1.70 for customer-dialed calling card calls;
 - (b) \$2.50 for operator-handled calls; and
 - (c) \$4.80 for person-to-person calls.
- (4) Notice of any change in the rates stated above, whether it be upward or downward, must be maintained in the company's tariff (via its web-site or its tariff on file with the Commission), on or before the effective date.

(C) Secured Inmate Facilities:

The following provisions apply to those operator service providers (OSPs) providing service to a secured inmate facility where the originating caller does not have access to other OSPs for the call from the secured inmate facility.

(1) Local operator-assisted calls:

For local operator-assisted calls, the AOS provider serving secured inmate facilities shall not charge the billed party more than the ILEC price list rates for a local operator-assisted call in the same exchange.

(2) IntraLATA and interLATA intrastate toll service calls:

For intraLATA and interLATA intrastate toll service calls, the AOS provider serving secured inmate facilities shall not charge the billed party more than the ILEC price list rates for an intraLATA intrastate call. This requirement includes both the rates for message toll service and operator surcharges.

- (D) The AOS providers shall not charge end users surcharges in addition to the price list rates for MTS and operator-assisted surcharges set forth in the AOS providers' tariffs. This restriction means that no surcharges, including but not limited to, bill rendering charges and any additional surcharge which a host facility may request the AOS provider to bill an end user, may be levied by the AOS provider on the end user. Any surcharges imposed by a host facility are to be billed separately by the host facility.

- (E) AOS and secured inmate facility services are not subject to either Tier 1 or Tier 2 regulatory treatment, but rather will remain subject to the provisions of these rules and the applicable provisions adopted by the Commission in Case No. 88-560-TP-COI.

☒ 4. ***LIMITATION OF LIABILITY***

The following is applicable to all telephone companies that choose to include in their tariffs language which may limit their liability (See also Case No. 85-1406-AU-COI):

Approval of limitation of liability language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a courts responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

☒ 5. ***TERMINATION LIABILITY***

The following is applicable to all telephone companies who choose to include in their tariffs language which imposes early termination liability on a customer for termination of service prior to the designated term of service:

Inclusion of early termination liability by the company in its tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.

☐ 6. ***SERVICE CONNECTION ASSISTANCE (SCA)***

The following is applicable to all LECs that offer local service to residential customers:

SCA is targeted to help defray the one-time, up-front costs of connecting to the local exchange network for qualified customers. It provides a waiver of the deposit requirement, full or partial waiver of the service connection charges.

☐ 7. **LOCAL NUMBER PORTABILITY and NUMBER POOLING**

See Case No. 95-845-TP-COI Guideline XIV, FCC Dockets 95-116 and 99-200. NOTE: LNP and number pooling are required of all facilities-based LECs, regardless of size, and CMRS where currently rolled-out by the FCC or as a result of a bona fide request unless granted an extension, exemption, or waiver by the Commission or the FCC.

☒ 8. **TARIFFING AND DISCONNECTION PROCEDURES FOR SERVICE PACKAGES OR BUNDLES**

Applicable to all LECs packaging or bundling regulated local services with toll service and/or unregulated services. See Rule 4901:1-6-21(C), Ohio Administrative Code.

☒ **Option 1****Tariffing**

Under option 1, LECs that package or bundle regulated local services with toll and/or unregulated services shall tariff only the regulated compenents of a package or bundle of services either as a package at a separate, single rate for the regulated compenents or individually at individual tariffed rates. The unregulated services and any rate(s) associated with the unregulated service compenents of any package or bundle of services shall not be tariffed.

Disconnection Procedures

Under option 1, if a customer fails to submit timely payment sufficient to cover the amount of the regulated charges, the LEC may discontinue the provision of the regulated services in compliance with Rule 4901:1-5-17, Ohio Administrative Code.

Staff Notice

Under option 1, LECs shall keep the Director of the Consumer Services Division and the Chief of Telecommunications of the Utilities Department informed and up-to-date on all current offers to consumers that bundle regulated local services with unregulated services at a single packaged rate, different from the rate shown in the tariff for the regulated componenets of the package. The notice to staff shall identify the regulated and unregulated services included and the packaged rate (the combined tariffed and untariffed rate).

☐ **Option 2****Tariffing**

Under option 2, LECs shall tariff the entire package or bundle of services including both regulated local services and toll and/or unregulated services for a single combined packaged rate (including any amount attributable to the unregulated components). The LEC shall clearly identify the services within the package and denote which services are unregulated.

Disconnection Procedures

Under option 2, if a customer fails to submit timely payment sufficient to cover the entire amount of the regulated and unregulated bundled packaged rate, the LEC may discontinue the provision of any regulated and unregulated services, other than basic local exchange service, if payment is sufficient to cover the rate for basic local exchange service. For purposes of this rule, the rate for basic local exchange service shall be the tariffed rate for stand-alone basic local exchange service. In the event a CLEC does not offer basic local exchange service on a stand-alone basis, the CLEC shall identify an amount in the tariff for the basic local exchange service component of the package. In no event shall this amount exceed the packaged rate. Further, if the customer loses services included in the package due to non-payment or partial payment pursuant to this rule, the customer shall be entitled to add, change, or discontinue any regulated services provided according to the LEC's normal procedures for adding, changing or discontinuing such services.

Disconnection Notice

Under option 2, the LEC shall, in its notice of disconnection for non-payment, state the total amount due to avoid discontinuance of the package, as well as the total amount due to avoid discontinuance of the basic local exchange service component of the package.

Customers may use services and facilities provided under this tariff to obtain access to services offered by other service providers. The Company is responsible under this tariff only for the services and facilities provided herein, and it assumes no responsibility for any service provided by any other entity that purchases access to the Company network in order to originate or terminate its own services, or to communicate with its own Customers.

2.1.2 Shortage of Equipment or Facilities

How Proposed Services Are in The Public Interest

The Commission's grant of this certificate is in the public interest and within Ohio's telecommunications objectives as set forth in section 4927.02 of the Code. Business consumers of telecommunications services in Ohio will receive increased choice and improved quality of service. Also, all consumers will have the opportunity to obtain improved technology in their businesses. The market incentives for new and existing providers of telecommunications services will be improved through an increase in the diversity of suppliers and competition within the local exchange telecommunications market. Consistent with the Commission's and the Code's purpose and intent to foster the development of a competitive telecommunications environment in Ohio, Applicant's request for authority offers increased efficiency to Ohio's telecommunications infrastructure through greater reliability of services and an increase in consumer choices.

In addition, early statements of this Commission recognize and foreshadow the growth of a competitive telecommunications industry. In many ways, Ohio is fostering competitive development in telecommunications. The Commission's focus on competition will prove to be a benefit to all parties involved. All consumers will enjoy greater availability of services, lower costs, higher quality, and increased efficiency and reliability. Consistent with the policy underlying the Commission's motivation of competition through regulatory and economic rules, Applicant's proposed services will provide multiple consumer and public benefits. These benefits include increased efficiency in Ohio's telecommunications infrastructure. This will occur through the provision of telecommunications services to users in Ohio. Also, heightened competition in telecommunications will stimulate economic development in Ohio by creating incentives for more innovative services, decreased prices, and greater quality and responsiveness to customer service.

Documentation of Technical and Managerial Expertise

Gene Denman
President
The T1 Company, LLC

Mr. Denman is a Founder and serves as President of The T1 Company and brings with him nearly 30 years of engineering, technical and senior management experience in the Telecommunications industry.

He began his career as a military communications systems engineer troubleshooting voice and data information networks for the US Air Force throughout Europe from 1976 to 1981. He was later employed by Sprint Communications in a similar capacity until 1986 when he became the Director of the Network Control Center for LCI International (now Qwest Communications). In 1989, while still employed at LCI Mr. Denman was appointed to serve in the Office of the Chairman and was involved in strategic planning and mergers and acquisitions, which later led to his appointment as President of a small long distance operating company in Lima, Ohio that had been acquired by LCI, called Afford-A-Call. Mr. Denman served as the President of Afford-A-Call, growing sales to over \$22 million before his departure in 1993.

From 1993 to 1997, Mr. Denman was a partner and owner of Impact Networking Solutions, a small telephone interconnect company serving Western and Central Ohio. Impact Networking Solutions sold small PBXs and Electronic Key Systems, along with local and long distance telephone service to small and medium size businesses. The company had hardware and network sales exceeding \$4 million when Mr. Denman sold his interest in 1997. Impact Networking Solutions continues today with 2001 revenues exceeding \$10 million from long distance sales alone.

From 1997 to 2000, Mr. Denman was a Director for Extant Corporation and was responsible for designing, engineering, implementing and monitoring a highly sophisticated national backbone network based on ATM (Asynchronous Transfer Mode) technology. Mr. Denman was responsible for building, staffing and overseeing the Extant Network Control Center and had direct responsibility for co-location equipment housed at several remote node locations throughout the United States. Extant was purchased in 2000 by energy conglomerate Dynegy Corporation.

Don Hemmelgarn
Secretary / VP Operations
The T1 Company, LLC

Mr. Hemmelgarn is also the President of The Compass Alliance, a Network Consulting and Management company that he founded in 1997. He brings with him over fifteen successful years of telecom sales and management experience. He was a charter member of the Ameritech Data "Five Star Council" serving for four years from 1991 to 1995, and served as President of the Society of Telecommunications Professionals in Cleveland, OH. Mr. Hemmelgarn is a published writer with articles that have appeared in several trade publications.

As a Managing Vice President for Telecomm Industries, a Chicago-based publicly traded communications company, from 1995 to 1997 Mr. Hemmelgarn had the responsibility of building and managing the data network sales in Ohio and Michigan. At the same time he was responsible for wide area data hardware sales throughout Ohio, Michigan, Indiana, Illinois and Wisconsin. From a startup operation the data division attained network and hardware sales in excess of \$10 million in 1997 and had 14 employees. Under his leadership, Telecomm Industries grew from \$300,000 in 1995 data sales, to become the largest Ameritech Data Distributor in Ohio in 1997.

Mr. Hemmelgarn was a sales executive at LOGOS Communications, a data hardware sales and service organization, from 1992 to 1995 selling wide area data and video communications hardware. He experienced the transition from host mainframe environments to client/server based LAN/WAN computing. His prior work experience and understanding of IXC network design, led to sales that concentrated on migrating customer networks from analog to digital. He was an early adopter and promoter of ISDN technology and quickly became a leading sales consultant on Basic and Primary Rate ISDN services.

At LiTel/LCI International he was a Senior Applications Engineer from 1988 to 1992 assisting more than 30 Account Executives and providing technical support to the customers. Mr. Hemmelgarn designed, priced, and oversaw the implementation of all Northern Ohio data networks for leased line point-to-point and multi-point networks.

Mr. Hemmelgarn holds a Bachelor of Arts degree from Wright State University in Business Communication, a Bachelor of Science degree from Wright State University in Marketing and a Master of Science degree from Ball State University in Information and Communications Sciences.
