RECEIVED-DOCKETING DIV

SUBJECT: Case No. 01-2708-EL-COI
Case No. 01-3019-EL-UNC
Case No. 89-6008-EL-TFR

Enclosed please find an original and six (6) copies of the Original Sheet No. 4, pages 14 – 15 of 24 of The Toledo Edison Company's Standard Rules and Regulations as approved by the Public Utilities Commission of Ohio on August 6, 2003. Additionally, Original Sheet No. 4, Page 19 of 24 of Toledo Edison's Standard Rules and Regulations as approved by the Public Utilities Commission of Ohio on December 19, 2002, this corrects an omission from the Company's February 3, 2003 filing.

Please file one copy each of the tariffs in Case No. 01-2708-EL-COI, Case No. 01-3019-EL-UNC, and Case No. 89-6008-EL-TFR, distribute two copies of the tariffs to the Electricity Division of the Commission's Utilities Department and return the final two time stamped copies in the enclosed envelope. Thank you.

Sincerely,

Stephen N. Hadick

**ELECTRIC SERVICE
STANDARD RULES AND REGULATIONS**

- iv. All developer-, builder-, or customer-requested rear lot line construction is a premium service. Where rear lot line construction has been requested, the charges for construction shall include the incremental cost differential between rear lot line construction and standard lot construction including any additional conduits and conductors for street lighting as an up-front payment by the builder, developer, or customer. The builder, developer, or customer shall also pay as an up-front charge, in addition to the amounts described above in this paragraph and in paragraphs 2.c.i and 2.c.ii as applicable, the differential cost between standard lot maintenance and rear lot maintenance, including maintenance for any additional conduits and conductors for street lighting. The maintenance cost due shall be calculated based on the net present value of the estimated cost of future maintenance for rear lot line extensions after subtracting the estimated cost of future maintenance for standard lot line extensions.
- 3. Line extensions on private property:** Customers that require line extensions to be constructed on their private property shall in all cases provide, without cost to the Company, land clearance, trenching and backfilling (including excavation for and installation of vaults), and an easement for right-of-way in a form acceptable to the Company before construction is started. The expectation that property will be dedicated to the public use at the conclusion of construction shall not preclude such property from being deemed the customer's private property for purposes of this subsection 3. All line extensions shall be the property of and shall be operated and maintained by the Company. The Company shall have the right to use such line extension in furnishing service to any applicant located adjacent to such line extension and the further right to construct other extensions from the distribution facilities so constructed. Except as provided herein, no customer or third party installation of line extension facilities will be permitted on private property or public right-of-way.
- 4. Relocation for Residential, Commercial or Industrial Customer:** A change in location of an overhead or underground service for the customer's convenience shall be made at the Customer's expense.
- 5. Relocation for Highway, Street or Public Works Project:** A change in location of an overhead or underground service to provide space necessary for highway, street, or public works projects shall be made in accordance with the contractual agreement with the government entity involved.
- 6. Other Items:**
- a. The Company shall not be required to begin any construction on any line extension until all required applications and up-front payments have been made by the customer, developer, or builder, as applicable.

**ELECTRIC SERVICE
STANDARD RULES AND REGULATIONS**

- b. Line extension cost estimates should not include costs normally incurred by the utility to maintain, protect, or upgrade its distribution system. Nor should system improvements required for the general distribution system that serves multiple customers, which are driven by the customer's load addition, be factored into the line extension calculations.

IX. USE OF SERVICE

- A. Increased loads:** The customer shall notify the Company of any significant additions or modifications to the customer's installation that will affect the customer's load characteristics so that the Company may provide facilities ample to maintain adequate service.
- B. Resale:**
1. Electric service is provided for the sole use of the Customer, who shall not sell any of such service to any other person, or permit any other person to use the same, without the written consent of the Company.
 2. The above provision does not apply to service provided to a landlord for resale or redistribution to tenants where such resale or redistribution takes place only upon property owned by the landlord and where the landlord is not otherwise operating as a public utility.
- C. Parallel operation:** The Company may agree to furnish service in parallel with a customer's generating facilities if the customer has adequate protective and regulating equipment and has sufficient trained personnel to perform the necessary operations, and further, at the Company's option, if the customer provides direct telephone connection with the offices of the Company's load dispatcher. The Company will not furnish service in parallel with a customer's generating facilities when, in the opinion of the Company, such parallel operation may create a hazard or disturb, impair or interfere with the Company's service to other customers.
- D. Low power factor:** The Company shall not be obligated to furnish service for electrical equipment having a power factor lower than that of presently available good-quality, high power factor equipment. If power factor corrective equipment is necessary, it, together with required switching equipment, shall be provided and maintained by the customer at his expense.
- E. Unbalanced loads:** The customer shall not use three phase electric service in such a manner as to impose an unreasonable unbalance between phases.

Interference: The Company reserves the right to discontinue service to any customer if the service is used in any manner so as to disturb or impair the operation of the Company's system or to interfere with the service to other customers. When such interference does occur due to the use of apparatus installed upon a customer's premises, such customer must provide necessary equipment as may be required to alleviate such conditions or the Company shall have the right to discontinue its service.

**ELECTRIC SERVICE
STANDARD RULES AND REGULATIONS**

Such Special Customer Services include: design and construction of customer substations; resolving power quality problems on customer equipment; providing training programs for construction, operation and maintenance of electrical facilities; performing customer equipment maintenance, repair or installation; providing service entrance cable repair; providing restorative temporary underground service; providing upgrades or increases to an existing service connection at customer request; performing outage or voltage problem assessment; disconnecting a customer owned transformer at customer request; loosening and refastening customer owned equipment; determining the location of underground cables on customer premises; disconnecting or reconnecting an underground pedestal at customer request; covering up lines for protection at customer request; making a generator available to customer during construction to avoid outage; providing pole-hold for customer to perform some activity; opening a transformer at customer request for customer to install an underground elbow; providing a "service saver" device to provide temporary service during an outage; resetting a customer-owned reclosure device; providing phase rotation of customer equipment at customer request; conducting an evaluation at customer request to ensure that customer equipment meets standards; or upgrading the customer to three phase service.

XII. COLLECTION OF PAST DUE BILLS AND DISCONNECTION OF SERVICE

- A. Procedures:** The Company procedures for collection of past due bills and disconnection of service to residential customers will be as specified in the Ohio Administrative Code, Chapter 4901:1-18, "Rules, Regulations And Practices Governing The Disconnection Of Gas, Natural Gas Or Electric Service To Residential Service."

The Company procedures for disconnecting service to nonresidential customers will be as specified in the Ohio Administrative Code, Chapter 4901:1-10-17, "Payment Schedule And Disconnection Procedures For Nonpayment By Nonresidential Customers."

- B. Disconnection:** Employees or authorized agents of the Company who actually perform the disconnection of service at the meter shall be authorized to accept payment in lieu of disconnection. In the event that the Company employee or representative is unable to gain access or is denied access to the meter and it becomes necessary to order service wires disconnected at the pole, the employee or representative disconnecting such service wires will not be authorized to accept payment in lieu of disconnection.
