RE: In the Matter of the Application of McClure Telephone Company to Decrease the Monthly Business Flat Rate for its Automatic Callback and Call Return Features and to Adjust the Monthly Caps; PUCO Case No. 06-523-TP-ALI

Dear Ms. Jenkins:

Enclosed are an original and five (5) copies of final tariff sheets to be filed on behalf of McClure Telephone Company in the above-captioned matter. The TRF Number for McClure Telephone Company is 90-5026-TP-TRF.

Thank you for your assistance. If you have any questions, please do not hesitate to call.

Very truly yours,

Carolyn S. Flahive

Enclosure

This is to certify that the above stated document delivered in the manner herein stated is a true and correct copy of the original document delivered in the manner herein stated.

P.U.C.O. NO. 5
GENERAL RULES AND REGULATIONS

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS)

A. General

1. Per Call Blocking

Enables customers to prevent the disclosure of their telephone number on a per call basis to the called party. The disclosure of the calling party's number can be prevented on a per call basis by dialing a preassigned access code before making a call. This action must be repeated each time a call is made to prevent the disclosure of the calling party's telephone number. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Call Blocking will be provided on a universal basis to all eligible customers.

All public and semi-public payphones in The McClure Telephone Company's service area will be equipped with Per Call Blocking.

2. Per Line Blocking

Enables customers to prevent the disclosure of their telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Line Blocking will be provided at no monthly charge on an optional basis to non-published customers. The service is also available to published customers at a monthly charge of \$1.00. Law Enforcement, Domestic Shelters and other special agencies will be offered free Per Line Blocking. Per Line Blocking will not be available to public, semi-public, and two-party service customers.

3. Automatic Callback

Automatically redials the last outgoing number after the customer activates the service by dialing *66 from a touch-tone phone. Automatic Callback monitors the busy line and performs a call set-up when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Automatic Callback service status. This service may also be used to recall a called party after the conversation has been terminated.

(T)

This feature is available on either a monthly flat rate basis or on a per-use basis.

(M)

4. Call Return

Enables a customer to return the last incoming call, whether or not it was answered. The customer dials the activation code of *69 from a touch-tone phone, and the last incoming call is announced. If the incoming call was placed from a line designated as "private", the recording will indicate that the number is private and will announce only the date and time of the call. To activate the Call Return function, the customer would then dial "1". If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes both the calling and called party's lines are checked periodically. The call set-up is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. Up to ten (10) calls may be held in queue for the customer's Call Return activation. The call backs may be to areas where a toll charge would be applicable.

(T)

This feature cannot be activated for calls originating from lines designated as private.

This feature cannot be activated for certain telephone numbers, such as numbers with the 800 or 900 prefixes, or PBX extensions.

This feature is available on either a monthly flat rate basic or on a per-use basis.

5. Caller ID

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services which will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customer-provided display device instead of the calling party's telephone number.

(M)

6. Selective Call Rejection

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may create a screening list of up to thirty-two (32) telephone numbers, and place them in network memory through an interactive dialing sequence. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Selective Call Rejection screening list. To activate the feature, the customer dials *60 from a touch-tone phone, and the telephone number of each incoming call is checked against the customer's Selective Call Rejection screening list.

(T)

7. Selective Call Acceptance

Provides the customer with a method to accept calls from certain numbers only. Up to thirty-two (32) numbers may be added to the screening list through an interactive dialing sequence. The customer dials *64 from a touch-tone phone to activate the service. Each incoming call is then checked against the customer's Selective Call Acceptance screening list.

(T)

8. Selective Call Forwarding

Allows customers to create a special list of up to thirty-two (32) telephone numbers and a destination number through an interactive dialing sequence. By dialing *63 from a touch-tone phone, the customer activates the service. Only incoming calls from numbers appearing on the list will be forwarded to the predetermined remote station.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (CONT'D)

- B. Custom Local Area Signalling Services (CLASS) cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately-equipped central offices, and routed over appropriately-equipped facilities for calls between such equipped central offices.

Telemarketers are prohibited from blocking the disclosures of their telephone number when placing calls. Upon receiving complaints that a telemarketer is blocking the disclosure of its telephone number, the Company will investigate the complaints and terminate the number blocking service where appropriate.

CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS) (CONT'D)

C. Rates and Charges (Cont'd)

5. Per-Use Feature Charge

The Call Return and Automatic Callback features may be accessed by and billed on either a monthly flat rate basis, as specified in Section C1., or on a per-use basis as specified below:

(T)

	<u>Rates Per Use</u>	<u>Monthly Cap</u>
Automatic Callback	\$0.75	\$6.00 (I)
Call Return	\$.075	\$6.00 (I)

The per-use Automatic Callback charge will be incurred upon dialing the Automatic Callback activation code

The per-use Call Return charge will be incurred upon dialing the Call Return activation code. If the called line is idle, the Call Return request completes irrespective of whether or not the called party answers. If the called line is busy, the customer is so notified when Call Return is activated.
