ORIGINAL SHEET 5
O.P.U.C. TARIFF NO. 1

TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the O.P.U.C. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the O.P.U.C. follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Number Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.1
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).1.
 - 2.1.1.A.1.(a).1.(i).
 - 2.1.1.A.1.(a).1.(i).(1).

TARIFF FORMAT (Cont'd)

- D. Check Sheet - When a tariff filing is made with the O.P.U.C., an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbol used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revisions levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the O.P.U.C.

- 3.9.2 All calls must be charged against a Company Prepaid Debit Card that has a sufficient calling minute balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted. Such announcement will occur when five (5) minutes and when one (1) minute remain before the balance will be depleted, based upon the terminating location of the call.
- 3.9.3 In order to continue the call, the Customer can either call the toll-free number on the back of the Company Prepaid Debit Card and recharge the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Company Prepaid Debit Card is insufficient to continue the call and the Customer fails to enter the number of another valid Company Prepaid Debit Card prior to termination.
- 3.9.4 A card will expire 12 months from the date of purchase, or the date of last recharge, whichever is later.
- 3.9.5 A credit allowance for Company Prepaid Debit Card Service is applicable to calls that are interrupted due to poor transmission, one-way transmission, or involuntary disconnection of a call. A Customer may also be granted credit for reaching a wrong number. To receive the proper credit, the Customer must notify the Company at the designated toll-free Customer service number printed on the Company Prepaid Debit Card and furnish the called number, the trouble experienced (e.g. cut-off, noisy circuit, reached wrong number, etc.), and the approximate time that the call was placed.
- 3.9.6 When a call charged to a Company Prepaid Debit Card is interrupted due to cut-off, one-way transmission, or poor transmission conditions, the Customer will receive a credit equivalent to one calling minute.

SECTION 3 - DESCRIPTION OF SERVICES (Cont'd)

3.13 Call Forwarding

3.13.1 Call Forwarding provides customers with a non-dedicated 800 number ("personal 800 number") to receive calls from any point within the continental U.S. for a monthly subscription fee of \$14.95 per 800 number. This monthly cost entitles the customer to twenty (20) minutes of use. The customer will be charged \$0.25 per minute for all use beyond twenty (20) minutes per month. The customer may have multiple personal 800 numbers per account. For each personal 800 number the Company will provide the customer with an 800 number, a security code, and a Rerouting Code which allows the subscriber to use the call forwarding 800 feature, by which the customer can receive incoming calls. The Company has the exclusive right to determine the terminating locations for personal 800 numbers. Call Forwarding customers share access on the same 800 number based on PIN and, thus, may not retain use of the 800 number if service is terminated.

This feature allows Call Forwarding customers to temporarily change the telephone numbers to which the 800 calls terminate. After calling into a voice prompted system via a Company provided 800 number, the customer may specify new telephone numbers to which its personal 800 calls will terminate (including a voice mail location). There is no limit to the number of call forwarding transactions a customer may make.

SECTION 3 - DESCRIPTION OF SERVICES (Cont'd)

3.14 Teleconferencing Service

- 3.14.1 Teleconference Service provides for a conference to be established by a Company operator on a dial-out or dial-in basis between multiple voice stations. The Teleconference Service provides a customized call reservation and call set-up process that may include directory speed dialing and, when requested by the conference originator, progress reports which provide information regarding the current status of the call.
- 3.14.2 The Company actively monitors Teleconference Service to ensure a high level of service quality and reliability. Upon request, and subject to availability, the operator will provide off-call monitoring. The off-call monitoring feature allows the operator to monitor the status of the call connections via a display of the conference ports used on that call. The operator is not a party to the call with off call monitoring. With off-call monitoring, the operator is able to identify and reconnect dropped conferees.
- 3.14.3 A Teleconference may be ordered on a demand or reserved basis. Pre-notification to conferees of a Teleconference is also available.
- 3.14.4 All charges incurred for the Company's Teleconference Service will be billed to the conference originator. Customers will be charged for each minute of port use incurred during the actual conference call and billed for such usage at the rate of \$0.25 per minute after the first twenty (20) minutes of usage for all the ports combined per month. There may be up to six (6) ports in use for each conference call. To determine the port minutes of use, multiply each port used by the number of minutes it was in use. A fractional minute of use for the port is rounded to the next highest whole minute. All conference announcements are designed for call establishment and completion and will only pertain to the conference call in question. Also, the bridge and associated features are furnished subject to the availability of components.
