Dear Ms Crockron:

In accordance with Case No. 90-5013-TP-TRF and Case No. 01-508-TP-ATA, issued by the Public Utilities Commission of Ohio, we are forwarding in the filing ten copies of the tariff pages below bearing the issue date of March 1, 2001 and the effective dates of April 1, 2001 and April 15, 2001.

Section 25	1st Revised Page 62	Cancels Original Page 62

It has recently been discovered that there is an **interaction issue with the LD Alert enhancement for those Call Waiting customers who also subscribe to the Distinctive Ring** feature. Due to this interaction issue, CBT will **continue to provide the previous version of Call Waiting Service without the LD Alert enhancement (for those customers who subscribe to both Distinctive Ring and Call Waiting Services on a stand alone or within Complete Connections) in addition to the enhanced Call Waiting service (for those Call Waiting customers who do not subscribe to Distinctive Ring on a stand alone or within Complete Connections)**. In addition, LD Alert will indicate whether an incoming call is long distance with a special ring pattern only when the Call Waiting subscriber is on a telephone call in progress. Due to this interaction issue between the Call Waiting and Distinctive Ring services, the effective date of the LD Alert enhancement will be postponed from April 1, 2001 to April 15, 2001.

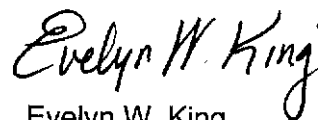

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business

LOCAL EXCHANGE SERVICE

SECTION 5 OUT OF TERRITORY LOCAL EXCHANGE SERVICES (cont'd)

5.4 CUSTOM CALLING SERVICE FEATURES (cont'd)

5.4.2 Service Descriptions (cont'd)

h. Call Transfer

Call Transfer allows a POTS customer to transfer an established call terminating on their telephone line to any other telephone line. Call Transfer allows the customer to (1) transfer the call and then hang-up, leaving the other two-parties on a two-way call, or (2) bridge the call and establish a three-way call. If the Call Transfer subscriber hangs up once a three-way call has been established the call will be considered transferred and the other two parties will be able to continue on a two-way call. The Call Transfer customer is free to originate and terminate additional calls after the call has been transferred. Any charges applicable to the call will be billed to the Call Transfer subscriber. Any toll usage will appear on the Call Transfer customer's bill.

i. Call Waiting (including Cancel Call Waiting and Long Distance Alert)

Call Waiting permits the customer, upon receiving a tone signal indicating that a call is waiting, to place an existing call on hold by depressing the switchhook, and answer the second waiting call.

Cancel Call Waiting permits the customer to deactivate the call waiting feature on an individual call by dialing a code before making an outgoing call.

j. Call Waiting Deluxe (including Cancel Call Waiting and Long Distance Alert)

Call Waiting Deluxe allows a customer to control the treatment applied to incoming calls while the customer is off-hook on an existing call. While on an existing call, Call Waiting Deluxe notifies the customer of an incoming call with the call waiting tone. Upon receiving the tone and where facilities permit, the customer may:

- Answer the incoming call and put the existing call on hold,
- Answer the incoming call and disconnect the existing call,
- Forward the incoming call,
- Connect the incoming call to an announcement,
- Put the incoming call on hold, or
- Conference the incoming call with the existing call.

Note: All options may not be available in all areas.

ISSUE DATE: March 1, 2001

Christopher S. Colwell, Vice President, Cincinnati Bell Telephone Company

EFFECTIVE DATE: April 15, 2001

In accordance with Finding and Order in Case No. 01-508-TP-ATA, issued by the Public Utilities Commission of Ohio, dated March 1, 2001 and Case No. 90-5013-TP-TRF

LOCAL EXCHANGE SERVICE

SECTION 5 OUT OF TERRITORY LOCAL EXCHANGE SERVICES (cont'd)

5.4 CUSTOM CALLING SERVICE FEATURES (cont'd)

5.4.2 Service Descriptions (cont'd)

j. Call Waiting Deluxe (including Cancel Call Waiting) (cont'd)

Utilization of the full capabilities of Call Waiting Deluxe requires the use of compatible CPE at the customer's premises and whether or not the user receives Calling Identity Delivery (CID) data for a waiting party (Caller ID type services). The installation and maintenance of the compatible CPE and the technical capability of that CPE to function in conjunction with the features of Call Waiting Deluxe is the responsibility of the customer. The Company assumes no liability, and will be held harmless, for any incompatibility between this equipment and the Call Waiting Deluxe features. The application of CID while a call is waiting allows the Call Waiting Deluxe customer to select a disposition option based on information about the waiting party. The CPE will determine how Call Waiting Deluxe options are displayed and selected, and in some cases, how they operate. Call Waiting Deluxe will be furnished only in connection with individual line service. The service is not available in connection with Centrex type services or private branch exchange trunk type services.

The Call Waiting Deluxe customer must also subscribe to Call Forwarding Don't Answer service in order to forward a waiting call to another location.

Cancel Call Waiting permits the customer to deactivate the Call Waiting Deluxe feature on an individual call by dialing a code before making an outgoing call.

Long Distance Alert (LD Alert) is a feature on the Call Waiting Service which indicates to all Call Waiting subscribers - while on a call in progress through a special signal - that an incoming call is long distance. When the Call Waiting subscriber is not on a telephone call in progress, LD Alert will also indicate that an incoming call is long distance with a special ring pattern.

k. Caller ID Name and Number

Caller ID Name and Number provides for the delivery of the listed name and telephone number associated with the calling party telephone number on incoming calls subject to the limitations in Section 5.4.1 above. This information is provided to a customer-provided display device attached to the subscriber's line or telephone set. This service will provide up to a maximum of 15 characters for display of the calling party's directory name and 10 characters for display of the calling party's directory telephone number. Caller ID Name and Number is only offered in appropriately equipped central offices. Delivery of the listed name may not be available in all areas.

The Caller ID Name and Number subscriber will be responsible for the provision of the display device. The installation, repair, and technical capability of the device to function with Caller ID Name and Number will be the responsibility of the subscriber. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with network features associated with this service.

LOCAL EXCHANGE SERVICE

SECTION 5 OUT OF TERRITORY LOCAL EXCHANGE SERVICES (cont'd)

5.5 CENTREX SERVICE (cont'd)

5.5.3 Definitions and Feature Descriptions (cont'd)

Call Waiting - Terminating - Provides the user with an audible tone to indicate that a non-intercom call is waiting when the service line is in use. Call Forwarding-Busy Line and Call Waiting-Terminating are mutually exclusive on the same line.

This service includes: a) Cancel Call Waiting permits the customer to deactivate the call waiting feature on an individual call by dialing a code before making an outgoing call and b) Long Distance Alert (LD Alert) which indicates to Call Waiting subscribers - while on a call in progress through a special signal - that an incoming call is long distance. When the Call Waiting subscriber is not on a telephone call in progress, LD Alert will also indicate that an incoming call is long distance with a special ring pattern.

Caller ID Name and Number - On incoming calls, Caller ID Name and Number provides the telephone number and listed name, when available, associated with the calling party, unless (1) the calling party's name and/or number is not accessible to the network because of where the call originates or (2) when the calling party invokes a per call or per line blocking feature which prevents the name and/or telephone number from being passed. Information may be displayed on a customer-provided display device attached to the subscriber's line or telephone set. Based on the current technology of the network, the name and telephone number of the calling party may be truncated. The Caller ID subscriber is responsible for providing the display device. The installation, repair and technical capability of the device to function with Caller ID Name and Number is also the responsibility of the subscriber. CBT assumes no liability and will be held harmless for any incompatibility of this equipment and resulting inability to perform satisfactorily with network features associated with this service. This service is not available for electronic or ISDN lines.

Circuit Switched Data Hunting - Allows a grouping of circuit switched data channels to a host so that calls to the host will be completed if there is an available channel anywhere in the group.

Conference Calling - 6 Way - Allows a station to establish a conference call involving up to five other parties.

Consultation Hold - Allows a user to add a third party to an existing conversation. The party initiating the call can hold one party with privacy exclusion while dialing and talking with another party.

Custom Set Configuration - A customization charge which is applied when a customer requests a non-standard configuration of feature buttons on an Electronic Service Line.

Customer - A single end user.

D Channel - A channel within an Electronic Service Line which is used to carry signaling messages. Optionally, user packet-switched data can also be carried in the D channel.
