RE: EASTON TELECOM SERVICES, L.L.C.
Case No. 03-1233-TP-ATA, 90-9032-TP-TRF

Dear Sir or Madam:

In accordance with the request of staff member, Paula Garretson, enclosed herewith for filing with the Commission, please find an original and ten (10) copies of the above captioned company's revised initial *Carrier to Carrier Services Tariff* pages 50-52.

These pages have been revised to include additional rates and charges and bring tariff into compliance with PUCO rules.

Also enclosed is a duplicate of this filing. Please date-stamp the duplicate received and return it to me in the enclosed self address, stamped envelope.

Should you have any questions or concerns relating to this matter, please contact the undersigned.

Very truly yours,

EARLY, LENNON, CROCKER & BARTOSIEWICZ, P.L.C.

Patrick D. Crocker

CARRIER TO CARRIER SERVICES TARIFF

SECTION 5 - SWITCHED ACCESS RATES, (Cont'd.)

5.2 Rate Categories, (Cont'd.)

5.2.2 Toll-Free 8XX Data Base Query

The Toll-Free 8XX Data Base Query Charge, will apply for each Toll-Free 8XX call query received at the Company's (or its provider's) Toll-Free 8XX data base.

5.3 **Billing of Access Minutes**

When recording originating calls over FG Access with multi-frequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over FG Access ends when the originating FG Access entry switch receives disconnect supervision from either the originating End User's Local Switching Center - (indicating that the originating End User has disconnected), or the Customer's facilities, whichever is recognized first by the entry switch.

For terminating calls over FG Access with multi-frequency address signaling, the measurement of access minutes begins when a seizure signal is received from the Carrier's trunk group at the Point of Presence within the LATA. The measurement of terminating call usage over FG Access ends when a disconnect signal is received, indicating that either the originating or terminating user has disconnected.

The measurement of terminating FG Access call usage ends when the entry switch receives or sends a release message, whichever occurs first.
