Re: Case 96-889-TP-ATA, ALLTEL Ohio, Inc.
TRF No. 90-5002-TP-TRF

Dear Ms. Crockron:

Please find enclosed, for filing with this Commission, one original and two copies of tariff pages as authorized by this Commission in its October 17, 1996 Finding and Order in the above-captioned matter. This filing establishes rules, regulations and rates for Call Return and Number Privacy.

Please return a copy of this letter indicating your date stamp for our files.

Very truly yours,

Kathy E. Hobbs
Manager, Governmental Affairs

S9. ENHANCED CENTRAL OFFICE SERVICES

S9.4 Enhanced Custom Calling Services

S9.4.1 General

Enhanced Custom Calling Services is a group of central office call management features offered in addition to basic telephone service.

S9.4.2 Description

A. Call Return

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered. The customer can dial a code and the number from which the last incoming call that was placed is announced. The call is not announced if the call was marked private through the activation of percall or per line number privacy. If the customer wishes to return the call, another number is then dialed to request that the network place the call. If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes, both the calling and the called lines are checked periodically for availability to complete the call. If, during this queuing process, the called line becomes idle, the customer is notified through a distinctive ring that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. Call Return will be deactivated automatically at the end of the thirty-minute period, or when the customer dials a deactivation code. Call Return does not interfere with the normal operation of incoming and outgoing calls during the queuing process. Call Return is considered activated when the customer dials the first code.

(C)

(C)

(C)

The Call Return customer is responsible for any applicable local or toll usage charges.

This service cannot be activated for all telephone numbers. Telephone numbers with 700, 800 or 900 prefixes cannot be activated.

B. Repeat Dialing

This feature, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If, during the queuing process, the called line becomes idle, the customer is notified through a distinctive ring that the network is ready to place the

S12. SERVICE ARRANGEMENTS

S12.16 Per Call Number Privacy/Per Line Number Privacy

S12.16.1 General

- A. Customers may prevent the disclosure of their telephone number when placing calls to a party with service that reveals the calling party's number, by subscribing to either Per Call Number Privacy, (see S12.16.2.A), or Per Line Number Privacy, (see S12.16.2.B).
- B. Per Call Number Privacy and Per Line Number Privacy are provided according to the availability of facilities, features, and central office equipment in locations determined by the Company. The features described will only operate on calls originating and terminating within suitably-equipped offices, or similarly equipped offices of interconnecting Local Exchange Companies.

S12.16.2 Description

A. Per Call Number Privacy

Per Call Number Privacy enables customers to prevent the disclosure of their telephone number on a per call basis to the called party. The transmission of the Directory Number and/or Directory Name to subscribers of Enhanced Custom Calling Services features as described in this Tariff can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the disclosure of the calling party's telephone number. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. (C)

B. Per Line Number Privacy

This feature enables customers to prevent the transmission of their Directory Number and/or Directory Name, on outgoing calls, to subscribers of Enhanced Custom Calling Services features as described in this Tariff. Per Line Number Privacy is applicable on all outgoing calls placed from the customer's line. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. (C)

Per Line Number Privacy will be provided at no monthly charge on an optional basis to customers of non-published service.

Per Line Number Privacy will be available for subscription to all eligible customers at the rates in paragraphs S16.6.2.B.
