Transmittal Letter
Revised Tariff Sheets Filed Pursuant
to the Commission's Order in
Case No. 02-323-TP-ATA
And
Case No. 90-5023-TP-TRF

01-2823-TP-ATA

Dear Ms. Crockron:

Attached are three (3) complete printed copies of revised tariff sheets authorized by the Commission in its Order in Case No. 02-323-TP-ATA. The tariff sheets introduce a new service, 211 Dialing Service.

The tariff sheets attached are:

<u>Tariff</u>	<u>Section</u>	<u>Sheet</u>
P.U.C.O. No. 7	Index 3	26th Revised Sheet No. 1 Original Sheet No. 119 Original Sheet No. 120

Acknowledgement and date of receipt of this filing is requested.

Very truly yours,

TODD COLQUITT
President

SECTION 3
Original Sheet No. 119

Verizon North Inc.

SWITCHED TELEPHONE SERVICES

7. 211 DIALING SERVICE (N)

7.01. General

211 Dialing Service ("211") utilizes a three digit local dialing arrangement to permit voice access to designated community information and referral services. The 211 code was assigned for this purpose pursuant to Order 00-356, issued by the Federal Communications Commission (FCC) in CC Docket 92-105.

211 is a custom call routing/transport application. It provides the calling party an easy to remember three digit dialing code with call delivery to established 211 service providers. Calls placed using 211 are automatically routed to the 211 provider's terminating telephone number. 211 utilizes various forms of call routing depending on the 211 provider's service requirements as well as Company's serving network facilities. Routing types include but are not limited to NPA, central office switch, NPA-NXX, and 9 digit zipcode where facilities permit. The physical boundaries of the available routing methods may or may not coincide with the boundary of the service area requested by the 211 provider, for example, a specific county.

7.02. Availability of Service

This service is available to telephone customers that have landline service served by Company's central office switched dial tone. This includes Company's landline customers as well as those served by landlines resold by Company.

The Public Utilities Commission of Ohio (PUCO) granted the request for the assignment of the 211 code that was made by the Ohio Council of Information and Referral Providers (OCIRP) and 211 Ohio Collaborative. Accordingly, Company will provide the 211 service to 211 providers who have been approved by the OCIRP and the 211 Ohio Collaborative.

The FCC will reexamine deployment of the 211 service five years after the effective date of the original order. At that time, the FCC will decide to continue the service, alter the service for another use, or remove the requirement for the service. If the FCC recalls 211, provider will return the code within 6 months of receiving written notice from the Company. The Company will work with all 211 providers affected by such recall to transfer their service arrangements to a 7 or 10 digit dialing arrangement within the 6 month notice period. The 211 provider will be required to migrate to any standard access arrangement for information services subsequently agreed to by the industry and approved by the FCC. The 211 provider will be charged the appropriate tariff rates for the establishment of the new access arrangement.

7.03. Limitations on Liability

7.03.01. See Section 1, "Obligation and Liability of the Telephone Company" on sheets 1-5 of this tariff. (N)

Issued: August 6, 2002

Effective: August 12, 2002

Original Sheet No. 120

Verizon North Inc.

SWITCHED TELEPHONE SERVICES

7. 211 DIALING SERVICE (Cont'd)

(N)

7.03. Limitations on Liability (Cont'd)

7.03.02. If requested by the Company, the 211 provider shall assist the Company in responding to complaints made to the Company concerning the 211 provider's service.

7.03.03. The Company assumes no liability for any issue arising from the fact that, in some 211 Dialing Service applications, physical call routing boundaries may not match exactly with the boundary of the 211 subscriber's requested service area, for example county boundaries. In these cases, calling parties could have 211 access to another county and/or area's 211 provider instead of their own county and/or area, as coordinated by the OCIRP and 211 Collaborative to the extent of the authority granted by the Commission's June 21, 2001 Finding and Order in PUCO Case No. 93-1799-TP-COI.

7.04. Rates

7.04.01 Nonrecurring Charges

The nonrecurring rates below apply only to a basic switch based 211 Dialing Service with no enhanced functionality and/or no toll transport charges. These rates assume:

- Call Routing by NPA or NPA/NXX
- Service areas involving political / municipal boundaries (i.e. county) may not match the NPA or NPA/NXX boundaries
- No 9 digit zipcode routing
- No time-of-day or day-of-week routing
- No statistical or report capability
- Calling party will be responsible for any local usage charges that apply
- All calling from Verizon landline switches in the service area is a local call to the 211 provider terminating number. If any of this calling is toll in nature, the 211 provider must provide a toll free terminating number in order to qualify for these tariffed rates.

	Nonrecurring Charge
Basic set-up charge for each customer application*	\$495.00
Switch translation charge (per host switch translated-remotes are excluded)	\$116.00

Applications that require provisioning by AIN (Advanced Intelligent Network), enhanced functionality and/or recovery of toll transport charges will require Individual Case Basis (ICB) design and rating.

*If a 211 provider petition is approved for multiphase deployment, the 211 provider has one calendar year (from the provisioning of the first phase) to complete the remaining phases without being charged for a subsequent set-up charge for each additional phase.
